WHY DO PROGRESSIVE DAIRYMEN BUY THE U.S. SEPARATOR?

Because they know that they will have one then that possesses more of the qualities that go to make up a perfect cream separator than any other make.

That the U. S. Skims Cleaner is an established fact, it having proved its superiority in this point at the Pan-American Model Dairy, where it made the World's Record of .0138 for an average of 50 consecutive runs, which has never been equalled by any other make of separator in the world.

That the U. S. is more durable is being shown daily in dairies all over the country by those who have used other makes, but who are now using the U. S.

That the U. S. is more simple is easily seen by everyone who has eyes.

That the U. S. is the safest, with its gears all enclosed, everyone can understand.

That the U. S. is easy to operate is testified to by its users.

For more reasons and copies of letters from hundreds of users certifying to the truth of the above statements, write for our special Dairy Separator catalogue.
