Pratts

Baby Chick Food

is a combination of simple nutritive elements in just the right proportions to properly feed baby chicks. It is a lot cheaper to SAVE the chicks you have than to hatch out more and lose them too. Improper feeding means weak, puny, stunted chicks or NO chicks. Pratts Baby Chick Food will save the youngsters and hasten their graduation into the producing class. "Your Money Back If It Fails."

Pratts Poultry Regulator

ensures fertile eggs and more of them. If a hen doesn't want to lay, she simply has to when she gets a little Pratts Poultry Regulator in her system, and it costs YOU but one cent a month per bird.

For 42 years this preparation has stood the test of continuous use, giving universal satisfaction and never injuring the stock. "Your Money Back If It Fails."

At your dealer's, 25¢, 50¢ and \$1.00;
25 lb. pail, \$2.50; 100-lb. bag, \$9.00.
