Old Methods Now Used in Modern War

Breastworks and the Wind Variations are Now Factors. Light Helmets and Motor Goggles Advocated.

London, July 22 (Correspondence of the Associated Press)—The London newspapers are urging upon the British government the advisability of adopting the steel helmet, as well as some simple form of protective breastwork, for the troops in France and Flanders. France, Russia and Germany have been experimenting along this line for some time, and France has recently a light steel helmet, suggesting in design the headpiece worn by men-at-arms six centuries ago.

The Old Methods
"One of the most remarkable features," has been the return to older, if not to ancient, methods. The steel fort has been discredited and the earth work justified; the strength and direction of the wind has become a leading factor once again, as it was in the days of bows and arrows, since aeroplanes are affected by the wind and gas attacks determined by it; hand grenades, bombs and catapults have assumed real importance. Finally the question of armor for the fighting man himself has come up for consideration.

Light Protective Armor
The value of a light protective armor is attested in several recent articles in the British medical journals. Dr. Devraigne, a French army surgeon, discusses in the Lancet the result of his tests of the new French helmet and gives it his unqualified endorsement. "The soldier who wears a helmet," he says, "escaped light wounds of the head and even wounds that would in ordinary circumstances have been severe are greatly mitigated. The helmet frequently turns off the bullet, in other cases dents or stops it, while in other cases it is perforated but acts as a heavy drag upon the force of the projectile so that hair and dirt are not driven into the tissues of the head."

For the Sailors
Dr. A. J. Hewitt, chief surgeon of the warship Pegasus in her fight with the Koenigsberg, writes in the Journal of the Royal Medical Service urging the adoption of some kind of protective armor by the navy. One of the remarkable features of the wounds which came under his observation, he says, was the smaller penetrating powers of the fragments of projectiles in open spaces like the upper deck. The danger zone so far as life was concerned seemed to be confined to a small area around the bursting space, and though the initial velocity of the fragments seemed to be very great it diminished rapidly, perhaps owing to their irregular shape.

Motor Goggles Good
"One seaman," writes Dr. Hewitt, "had his right arm so shattered that complete amputation was necessary but a fragment of the same shell hit the brass buckles of his belt, breaking it but not even bruising the abdomen. Small fragments were also the cause of the loss of four eyes, but I am of the opinion that a pair of motor goggles would have saved all these. A case of injury to the jugular vein caused by a minute particle of shells probably could have been stopped by a linen collar."

Light Chain Armor
"In my opinion a coat of light chain armor, or even leather, with a pair of goggles made from toughened motor screen glass, would be invaluable to captains of destroyers, navigators and others in exposed positions who are likely to encounter ships armed with similar guns."

Dr. Delorme, medical inspector general of the French army, believes that protective armor would cause a marked decrease in the large number of minor wounds which have serious results owing to the development of infection. "It is infection through hair, shreds of headgear, soiled bullets, irregular dressings, etc." he says "that makes minor head lesions so dangerous and causes a mortality of varying from 15 to 57 per cent."

Amounts Collected for Aeroplane Fund by Wm. Tulk, J.P.

Burgoyne's Cove,
August 13, 1915.
(Editor Mail and Advocate)
Dear Sir,—Will you kindly favour me by publishing in your next issue (if possible) the enclosed list as it stands. I have been specially requested to ask you to do so as to satisfy the subscribers and to justify myself as collector.

I sent the list to the Treasurer of the Aeroplane Fund but he omitted publishing names which have given rise to some idle talking. I shall be very glad indeed if you can oblige me in this request.

Yours respectfully,
WM. TULK, J.P.

A New Medal
London, Aug. 8.—King George has sanctioned the establishment of a medal to be known as the Naval General Service Medal. This will be awarded for service in minor naval warfare operations, whether in the nature of belligerency or of police sufficient importance to justify the other medal would be appropriate. It is stated that these medals will be awarded to the officers and men of the warships employed in the operations for the suppression of traffic in arms on the Arabian Sea and the Persian Gulf between October, 1908, and the 1st of August, 1914.

Magnitude of Teuton Plans Is Revealed

London, August 8.—The Germans continue to make progress in all directions in their efforts to cut off the retreat of the Russian army from the Polish salient. They have commenced an attack on the fortresses of Kovno and Ossowetz, which are among the obstacles they must overcome in order to reach the railway running from Warsaw through Vilna and Dvinsk to Petrograd.

They have taken the minor fortress of Serock at the junction of the Narew and the Bug, and have crossed the Vistula in the vicinity of Warsaw. Further south General Woyrsch is advancing eastward, but Field Marshal Mackensen is being stubbornly resisted and apparently making at the best very slow progress.

A Daring Project
On the whole the daring scheme mapped out by the Germans as a grand sequel to the capture of Warsaw—the destruction of the Russian army—is unfolding itself slowly, as must be the case from its very magnitude. With the three main railways, besides those built since the war, it is believed in military circles here that the Grand Duke Nicholas will be able to extricate his Warsaw army. The events in the East, however, will continue to rivet the attention of the world on them for some time to come.

In The Argonne
The Germans have gained minor successes in the Argonne forest, where the army of the Crown Prince has been trying for some weeks to find a weak spot in the French defences, but their effort to recover lost trenches on the Lingekopt in the Vosges is declared to have cost them dearly.

There has been some rather heavy fighting in the Caucasus between the Russians and the Turks, but the official reports from the opposing camps is so contradictory that it is impossible to say in whose favor it is going.

There is much interest in the diplomatic negotiations in the Balkan capitals, the reports from which indicate that Serbia at least is willing to cede Macedonia to Bulgaria, but that the Greek government is now opposing any suggestion that she should return Kavala, the seaport in the vilayet of Saloniki, to Bulgaria.

Venzelos' Attitude
It is thought, however, that this opposition may be changed when M. Venzelos returns to power, which is expected when the Greek parliament re-assembles early in September. M. Venzelos offered Kavala to Bulgaria when he was premier, simply in return for his continued neutrality while Greece went to the assistance of the allies against the Turks, but King Constantine put his foot down on the whole policy and the political crisis which resulted in the resignation of the Venzelos cabinet followed.

The Petrograd Bourse Gazette publishes a statement to the effect that Germany has made peace proposals to Russia but that they were rejected. There is no confirmation of the statement.

FIRE PROTECTS GERMAN TROOPS

Roaring Wave of Flame Confronts Allies, Who Die of Suffocation

London, Aug. 10.—The use of gas by the Germans has almost ceased because the Teuton armies found it dangerous to themselves and that the British and French had learned how to escape its deadly fumes.

Now fire is being used. The effect of flames is much worse than gas, but it is easier to find shelter from them. The flames carry only a relatively short distance and cannot reach you a long way off, as often is the case with poison gases.

The flame is yellow with a blue nucleus, and is directed through a powerful air jet. It springs from the ground level and expands into a roaring wave of fire. Indeed, the flame is very much like that of a common Bunsen burner, used in a laboratory, only yellower.

The pressure of air or other gas that is used to force the inflammable liquid through the jet must be enormous, in view of the volume and fury of the flame. Many of the victims died simply from suffocation, caused by the intense heat that rolled forward in front of the flames, which did not touch them.

If all you need is an opportunity, get busy and make one.

HALLEY & CO.

Wholesale Dry Goods and Commission Merchants, 106-108 New Gower St.

We are well known to the trade, and we make it a point to give SATISFACTION in our dealings with them. We only ask for a chance to quote prices, and are therefore sure of your order in almost every case. We are SPECIALISTS in DRY GOODS, having TWENTY-FIVE YEARS' EXPERIENCE in the business. All we ask is to phone or write us for quotations before placing your orders. By so doing, our benefits will be mutual.

HALLEY & CO.

"Victory" Flour

Increased Sales to last year's customers proves flour satisfactory; also flour to be as represented, highest grade Manitoba. 35,000 barrels sold for Fall delivery.

Franklin's Agencies, Limited,
Agents.

Lanterns and Globes

ALL PRICES.

CLIMAX--Tubular
STANDARD--Cold Blast
TRULITE--Cold Blast

Globes to suit all styles.

THE DIRECT AGENCIES LIMITED.

GEORGE SNOW

SHIP AND GENERAL IRON WORKER AND MACHINIST

I am extending my business by the installation of up-to-date machinery whereby all kinds of the following work will be turned out with dispatch and satisfaction.

FORGING IRON AND BRASS CASTING OF EVERY DESCRIPTION & PATTERN MAKING.

Saw Mill Work and Repairs to Motor Engines and all kinds of Machinery, etc.

With our equipment we are enabled to guarantee every satisfaction and ensure prompt delivery.

Large Stock of Material always on hand.
Brazing broken parts of machinery done by special process.

Note carefully the address:
GEORGE SNOW
SPRINGDALE STREET (WEST SIDE).

Military Boot Contract

A contract for 110,000 pairs of boots of military pattern for Canada's troops was yesterday awarded by the purchasing commission to a number of firms. It is understood the price ranged from \$3.90 to \$4.

The new boot embodies the features recommended by Mr. S. R. Wickett, General Hughes, the expert called in by the purchasing commission. A list on practically non-partisan lines of clothing manufacturers has been compiled. The names of a number of firms which proved unsatisfactory on former orders have been eliminated and others will get the contracts.
