J. H. WOOLLEY
Burford - Bell and Automatic Phones

Bullets of paper or tallow have been found to be productive of far greater damage than metal ones when used for short distance firing. During some experiments in this direction it was proved that, whereas a metal bullet penetrated a deal plank an inch in thickness and left a neat hole, a paste board bullet had a far greater destructive effect upon the target. A paper bullet passing through 6 pieces of tin, placed at a distance of a foot apart, buckled them up completely, whereas a metal bullet merely left a small round hole.

In no direction has the equipment of the light car progressed more satisfactorily than in the adoption of dynamo lighting sets. The latter are now neat and simple. At the same time the difference in the first cost of the equipment will make acetylene lamps particularly with the extended use of dissolved acetylene, the convenience of which in its latest form renders it a great rival to electric lighting. Where, however, the latter scores is that the entire set of lamps, including the tail and dashboard lights, is worked off a single plant, which is one that needs practically no attention, while the current can be used for actuating the horn and a self starter.

Old Age Finds Its Greatest Comfort

in good eyesight. Reading or sewing are practically the only diversions of most old people, and unless they are able to enjoy these pastimes in comfort life holds but little for them.

Be sure that the "old folks" in your family have the opportunity to enjoy this blessing to the full. They cannot have it without good glasses—glasses selected at random or by "trying on" will not give it to them.

Bring them here and have an accurate examination of the eyes made. You may be surprised to find they had forgotten what really perfect vision is.

Some Fine Pictures in
Picture Framing

It is stated by a famous entomologist that a species of white ants have attacked the lonely home of an Indian farmer, and in a short time have eaten house. These ants, according to the entomologist, have no eyes, can live only in darkness, and their food is wood. The entomologist also states that they resemble bees in appearance.
