Itched Constantly—Scratched Until Blood Flowed—Suffered 10 Years —Doctors and Medicines Were Fruitless—Tries Cuticura and Is Completely Cured

BY THREE BOXES OF **CUTICURA OINTMENT**

"When I was about nine years old small sores appeared on each of my lower limbs. I scratched them with a brass pin and shortly atterwards but a street to the control of those limbs became so sore that I could searcely walk. When I had been suffering for about a month the sores began to heal, but small scally eruptions appeared where the sores had been. From that time onward I was troubled by such severe itching that, until I became sores until the blood began to flow. This would stop the itching for a few days; but scally places would appear again and the itching would accompany them. After I suffered about ten years I made a renewed effort to effect a cure. The eruptions by this time had appeared on every part of my body except my face and hands. The best doctor in my native county advised me to use arsenio in small doses and a salve. I then used to bathe the sores in a mixture which gave almost intolerable pain. In addition I used other remedies, such as iodine, sulphur, zinc salve, such as io

NEW QUEEN OF THE SEAS. Lusitania Plowing the Ocean at Rate of 25 Knots.

of 25 Knots.

New York, Sept. 12.—Plowing the seas at a speed never before attained by a steamship, the giant turbiner Lusitania of the Cunard Line is sweeping along at a 25-knot clip on her maiden voyage to New York, and a wireless message received from Cape Race, Nfid., early yesterday, shows that the Lusitania has broken all records for a transatiantic steamer.

wireless message received from Cape Race. Nfid., early yesterday, shows that the Lusitania has broken all records for a transatlantic steamer.

If she maintains her speed through the last 1,000 miles of her trip, the hope of a four-day trip across the Atlantic will have been realized. The Lusitania came into the wireless zone of Cape Race at 3,20° o'clock yesterday, and telegraphed that she was shen 225 miles southeast of the Cape at the time, or 1,125 miles from the Sandy Hook lightship.

Speed 231-2 Knots.

The despatch yesterday showed that the big ship had covered 1,655 miles of the voyage in approximately 70 hours through swelling seas and murky fogs, which hindered her progress, and that she had averaged a trifle better than 231-2 knots an hour, a speed record never before tacched by a transatlantic steamship on the west-bound voyage.

The Lusitania is expected to flash

ords for a transatiantic steamer.

If she maintains her speed through she last 1/000 miles of her trip, the she per of a four-day trip across the Lussiania came into the wince yester-day, and telegraphed that she was sheen 22s miles and that she was sheen 23s miles from the Sandy Holo lighthip.

The despatch yesterday showed that the big ship had covered 1,655 miles of the voyage in approximately 70 hours through swelling seas and mark the big ship had covered 1,655 miles of the voyage in approximately 70 hours through swelling seas and mark she had averaged a trifle better than 231-2 knots an hour, a speed of 20-12 knots an though the showed that the by a transatiantic steamship orne week bound voyage.

The Lusitania is expected to flash by the red-hulled lightship of Sandy Hook about 1 o'clock Friday morning, which would make the time of the woyage about 4 days and 11 hours and 25 minutes, made by the Lucania of the conner than 13 hours betten the sheet of the swell of the Hamburg-American Line. The Deutschland made a voyage from the Deutschland made a voy

saving power of the atoning blood of Jesus Christ."
You are like St. Veronica as described by the legend of old. According to tradition, St. Veronica was a pious woman of Jerusalem. When Jesus was being led forth to his crucidixion, staggering under the weight of his cross, the blood and the perspiration were rolling from his face and body. Christ was tottering along from weakness. Taking pity on him, St. Veronica took her head cloth to wipe his face and cleanse his brow. When Iesus gave Veronica back her cloth he lineaments of his face had been mprinted upon it, and the old legend ells us it was from this imprint that he present idea of Jesus' features have been copied. Has it not been so tith the children of godly parents? The Christian mother has so loved

him true and honest and pure. You did not think you were a city set upon a hill. You did not know your gospel light was shining before men in the store. But to-day, as a business man, you are a spiritual archer, and you cannot help yourself. You are fighting for or else you are fighting against Christ in the store, and your arrows are flying every whither.

But if it is important that we should use our influence for Christ in our financial dealings is it not also important that we should use that influence for Christ in our social intercourse? Indeed, I often think it more important how we deal with our fellow men for Christ in our social intercourse than in business, for then we are able to study men's peculiarties and find out "the joints of their harness." And every man has his vulnerable spot in which he can be reached for Christ. When we meet men in social intercourse we find them off their guard. Then it is so easy to bring them to Jesus if we can only touch the right spot. I never had this fact so powerfully presented to me as by an old friend, who was telling me an incident connected with the laying of the Atlantic cable.

Some years ago Charles Kingsley was on a lecturing trip through the United States. He was in company with a friend of my informant, were traveling together in the same coach. To lighten the tedium of the journey Mr. Field began to tell some of the incidents of the laying of the cable. He had completely failed to raise enough money for the undertaking in America. Then he went to England for help, but skepticism confronted him everywhere. The people said an electric current could not be sent a distance of \$,000 miles under the sea. It was an impossibility. At last, completely discouraged, he was about to come home when he went to bid farewell to Charles Kingsley. "No." said Mr. Kingsley, "don't give up yet. I want you to go and call on Lord Soand-so. I believe he will help you out." "No," said Mr. Field; "there is no need of going. Lord So-and-so. them to the utmost of our power, and then he must look after the issue. With the weakest of agents God can achieve the most infinite results. Are you ready to-day to be one of God's spiritual agents? Are you ready to do all you can in every way you can, even though all your efforts may seem to be very little? You must leave the results with him. Your duty is to raise your hand as high as you can for Christ. Will you lift your hand high for him now?

Balloons to Be Popular.

Balloons to Be Popular.

Captain Pustan, a German naval expert, publishes a prediction that within a decade motor-airahips will come into general use, not only for military, but also for sporting and other purposes. He says:

"We must realize that the atmosphere, like the ocean, offers us innumerable routes of travel. Who in the future will invest his money in the construction of cable railways and rack and pinion railways up mountains, when it will be possible to reach the most elevated points more rapidly and more agreeably, with less danger, by means of airships?

"There can be no doubt that sportsmen, scientific men and enterprising capitalists of all countries will devote their energies to the application of aerial navigation to their respective purposes. When a few improvements have been introduced in airships they will be serviceable as a means of transport, and will certainly be preferred by some classes of travelers to railway trains."

Same Paupers In Asylums. Complaints were made at a meeting of the Nottinghamshire County Council regarding the growing expenditure in connection with the maintenance of lunatic asylums. It was stated that this was often increased by the action of guardians, who ordered the removal from workhouses of old and infirm people, who were not fit subjects for asylums.

HOT WEATHER RECIPES.

ice Creams That Can Be Made From

A Good Everyday Ice Cream.-Bring scorching. Stir in one tablespoonful of cornstarch dissolved in a little cold milk and cook fifteen minutes. Beat two eggs until lemon colored and thick, add to them one-half cup of sugar and stir into the thickened milk. Cook a moment, no longer, take from the fire, flavor with a teaspoonful of vanilla or lemon, cool and freeze.

If you wish to make brick-ice cream

use two tablespoonfuls of dissolved gelatin to a quart of milk.

Maple Sauce For Ice Cream.—Cook without surring until it "threads" a pint of maple sirup and a half cup of cream. When a little of the sirup cooled in cold water can be rolled into a soft ball between the fingers take from the fire and stand in a pan of hot water until ready to serve with the cream

sauce put four squares of unsweet chocolate into a saucepan and stand in a larger dish of hot water. Stir until the mixture is smooth, then cool without stirring until it reaches the "ball" stage. Add to either the maple or chocolate sauce a half cupful of English walnuts or butternuts chopped fine when you wish a superlatively fine dessert. Keep the sauce hot without further cooking until ready to serve with the cream.

Catskill Vanilla · Cream.—Beat the yolks of two eggs until lemon colored and thick. Add one cup of powdered sugar and a pint of milk that has been brought just to the boiling point and cook two minutes in a double boiler, no onger. Stir in the whites of the two eggs, beaten stiff; a teaspoonful of vanilla and a quarter of a teaspoonful of almond. When cool add a pint or half pint of cream, freeze and pack.— Emma Paddock Telford.

CRYSTAL BASKETS.

Unique Table Ornaments For Holding Flowers and Fruit.

Crystal handle baskets, both large and small, which must surely commend themselves to the hostess who has an eye for beautiful table furnishings, were seen recently at one of the ave-nue shops. The large baskets are

INDIVIDUAL DISHES FOR BERRIES MADI

are used for flowers. They are ideal receptacles for roses, as was demonstrated by a hostess at a recent fashionable dinner, who provided them, filled with these flowers, as favors for her guests. The smaller baskets are decidedly new and lined with green leaves make charming receptacles for berries. For a dinner where one of the large handle baskets filled with flowers is used as a centerpiece the smaller ones can be used effectively for a desser course of ice cream, surrounded by fresh berries with a few of their leaves.

Even smaller still are the little bas-kets intended as individual dishes for salted nuts. They are not more than three or four inches in diameter and are exceedingly graceful in shape. Some of the baskets are of clear crys tal, with a hair line of gold or greet twisted about the handle. Others are green with rich floral designs in gold.

The Picnic de Luxe. What a picnic picnicking has become!
Time was when a luncheon in the
woods meant tedious lugging of cumbersome baskets and labored portage of stone jugs or, still more annoying, glass jars containing the beverage,

whatever it might be.

If one took lemons along in the fond hope of enjoying lemonade ten to one it was such a bother to get cool water that the drink wasn't worth the trought of the drink wasn't worth the trought belonger

it was such a bother to get cool water that the drink wasn't worth the trouble. As for butter, cream and kindred essentials to real lunching, they either had to be left behind or eaten in conditions far from palatable.

The shortest tramp under a blazing sun meant that everything meltable melted, and one was lucky if the meat in the sandwiches didn't spoil. Now there are several makes of picnic hampers, all of which are good. In any of these solid and fluid refreshments may be transported many miles and kept as appetizing as they would be at home. There is a compartment for ice, and so scientifically is the refrigeration arranged that a small hump will keep everything delightfully cool.

The best of it is that the hamper is as light as is compatible with strength, and the weight of the eatables and drinkables is about all that has to be considered. Any of those hampers can be stowed away in an attomobile or surrey, and all save the larger sizes can be carried comfortably on the arm.

fortably on the arm.

To Hang a Skirt.

A good way to hang a skirt for one

A good way to hang a skirt for one self is to sew up seams, press nicely, baste tucks or plaits in place, put on band, then fold skirt in half and lay band, then fold skirt in half and lay on table and take a finished skirt which hangs correctly and lay over same, putting a basting or row of pins around bottom edge to show where to turn up new skirt—an easy and satisfactory way. To put in sleeve correctly fold armhole, having center fold one inch back of shoulder seam, and where the half comes join under seam of sleeve. This always insures a perfect of the state of
