## DREADFUL MINE ACCIDENT.

Chain Runner's Mistake Brings Awful Death to Three Men.

Halifax, N.S., July 8.—A shocking accident by which three miners were instantly killed at No. 4 colliery of the Nova Scotia Steel Company's Sydney mines is one of the worst which ever occurred in that district of the Cape Breton coal fields. The dead are: John W. Nicholson, aged 22, leaving a wife and four children; Dennis Pendergast, single, aged 35 years, and Richard Broderick, 27 years, who leaves a wife and two small children.

The three men were working in the deep, when, without a moment's warning, a loaded box came crashing down the bank and into the pit, giving the unsuspecting men not the slightest chance to get out of the way. Yesterday afternoon the Coroner, visited the scene, where it was ascertained the accident was largely due to the carelessness of a chain runner, Arthur Pearo, who, before shifting the switch to divert the car to the bank, detached the car from the haulage rope and allowed it to return at terrific speed down into the pit, where the men were at work, a distance of four hundred feet. When Pearo noticed his terrible mistake and saw the car pass from him and shoot into the mine he ran after it and shouted at the top of his voice to the men below, but they could not hear. When the victims were discovered they were buried under a ton of coal which had been thrown out by the force of the impact. The three men were taken to the surface. Broderick was dead, a large hole in the top of his head exposing the skull. Nicholson and Pendergast lived a short time. Doctors marvelled how they could live any time, in view of their terrible injuries. Pendergast was badly injured about the body and both legs were broken in several places. Arthur Pearo, who failed to shift the switch, is almost distracted. He makes no attempt to shift the responsibility, but blames himself for the whole thing.

## JAPAN HASN'T COIN FOR WAR.

Britain Placed In An Embarrassing Position.

London, July 8.—The present tension between the United States and Japan is exciting the keenest interest among all the European diplomats. None of them, however, believes that it will reach the stage of war, because the heavy burden of debt Japan is carrying as a result of her failure to obtain indemnity from Russia forbids her embarking on a similar costly enterprise in the next decade. It is recognized, nevertheless, that the United States economy, the enmity of Japan as one of her nation's assets which may prove a handicap in the event of trouble with any other power. Great Britain finds herself in an embarrassing position also, because she is obliged to stand between her colonies and her ally in the matter of anti-Japanese laws. There has just been put into operation a law regulating the entry of Asiatics, which applies to Indian subjects, as well as to the Japanese and the Chinese, and which compels them to submit to an examination and registration with thumb prints, like criminals, which is exceedingly irritating to them. Australia threatens further legislation on the same lines.

## Killed While Sleep-Walking.

Montreal, July 8.—A peculiar accident, resulting in the death of Joseph Robert, 15 years old, son of the chief of police of Lachine, is reported from Oka, near the city. The boy was at school and was in the habit of walking in his sleep, and during the night, when in one of his sleep-walking fits, he went to a window and jumped out, falling a distance of over 50 feet. His dead body was not found until the following day.

## Charged With Shooting.

Edmonton, July 8.—As a climax to the Fourth of July celebration here, Charles Smard, formerly proprietor of the St. Elmo Hotel, is lying in his home at the point of death, and Frank Mikola is under arrest, charged with shooting him. The bullet was fired through a basement window.

## Drowned While Fishing.

Kingston, Ont., July 8.—Elmer Oedra, 9 years of age, fell through the beams of an open pier alongside the "Moose" elevator at the foot of Gore street, while fishing Saturday evening, and was drowned. The body was recovered by a diver before midnight.

## Jew-Baiter Assassinated.

Yokohama, Japan, July 8.—Captain Pushkin of the gendarmes was assassinated on the streets of this town yesterday. He was unfavorably known as the organizer of the anti-Jewish attacks at Valogda in 1905, when many lives were lost.

Prudence supplies the want of every good.

## TILBURY

Tilbury, July 8.—Mrs. C. C. Maskey, of Deer Is., is visiting her sister, Mrs. Allan Pearson.

George Chalmers took a party of fifteen to Chatham yesterday in his launch.

Mrs. (Rev.) P. Nienor and children are visiting relatives at Durham, Grey County.

Miss Effie Shaffer returned yesterday from Windsor to spend vacation with her mother here.

The English Church Sunday school will join Christ Church, Chatham, Sunday school on their excursion to Walpole to-morrow via City of Chatham.

Miss May Lumley leaves on Wednesday on an extended visit with relatives at Calgary.

Misses Ruth and Lela Powell spent Saturday and Sunday in Detroit.

Mrs. Edgecomb has returned from a few days visit at her home in Tillsonburg.

## HAYWOOD TO TAKE STAND.

Examination of Accused Murderer Will Likely Be Long.

Boise, Idaho, July 8.—Counsel for the defence in the Haywood murder case held a long conference Saturday both at the downtown offices and in the cell of Haywood, Moyer and Pettibone at the county jail, and it was said afterward that it would be next Wednesday before Haywood would take the oath as witness in his own behalf.

The program as it now stands is to begin Monday morning by reading the depositions taken at San Francisco as to the explosion at the house of Fred Bradley. These depositions are to be supplemented later with the evidence of an expert in explosives. It is contended by the defence that if 10 pounds of dynamite had been exploded, as Orchard swears were contained in the bombs, he used, that amount would have blown Bradley into pieces and destroyed the whole front of the building.

Additional testimony will be given to show that before he fled from the Cour d'Alene in 1899 Orchard attempted to sell his interest in the Hercules Mine. There will be a showing also as to the movements and actions of Jack Simpkins when he went to Denver in the fall of 1905 after having parted with Orchard at Caldwell. This will about conclude the case, except for the testimony of Haywood and Moyer. It is believed that Moyer's testimony can be reached by Tuesday afternoon.

Steve Adams will not be called by the defence. To call him would open the way for the state to get his repudiated confession before the jury, and it is deemed the better strategy to avoid this.

The direct examination of Haywood, according to the statement of counsel for the defence, will be long. He will give a sketch of his life which will embrace all of its important events, including his connection with the Western Federation of Miners. It is said that opportunity will be given for the fullest and widest cross-examination that the prosecution may decide to make. Haywood will explain that the \$100 sent to Jack Simpkins nine years before Simpkins was murdered was the remainder of a federation expense account which Simpkins left with Haywood to be forwarded to him at his home in Spokane.

The presentation of the states' rebuttal will probably begin on Thursday next, and be carried over into the succeeding week.

## Serious Damage by Frost.

Chatham, Ont., July 8.—J. B. Stringer & Co. have received the following letter from their agent, W. McKenzie, Thamesville, regarding damage to crops by the late frost:

"Farmers are confirming the reports of serious damage by frost. Many at first thought that much of the crop would recover, but to-day they claim it is not doing so. Corn and beans will be less than half a crop. There was a large acreage of beans, too, and they looked most promising on Tuesday."

## Strong Note to Sultan.

Tangier, July 8.—It is understood the British Minister to Morocco, G. A. Lowther, is preparing to send a strongly-worded note to the Sultan on the subject of the capture of Kaid Gen. Sir Harry MacLean, commander of the Sultan's bodyguard, who recently was made a prisoner by the bandit Raisuli.

The Kness tribesmen, fearing the hostility of the Sultan, are considering the advisability of opposing Raisuli.

## Joe Wynn Captured.

Winnipeg, Man., July 8.—Word was received yesterday that Joseph Wynn, who is charged with attempting to kill J. Storoy and who last week escaped from the jail at Grandview, Man., was captured at two o'clock today by a posse which had been chasing him a week.

Cloth Balls to Remove Grease.

Cloth balls are very handy to have in the house, and though they can be bought at the chemist's, they can quite easily be made at home and of course are cheaper. Take half a pound of dry fuller's earth and moisten it with a little lemon juice. Then add half an ounce of finely pulverized pearl ash and work it into a thick paste. Roll into small balls and set them in the sun or a little distance from the fire to dry, says Woman's Life. In a few hours they will be ready for use. When required the stained cloth should be moistened with warm water and rubbed with the balls. Place in the sun to dry and then brush off the powder or wash it out if necessary.

Minard's Liniment cures Dandruff

**SUNSHINE FURNACE**

The Sunshine is differently and better constructed than common furnaces. It's stronger, safer, more healthful.

The dome, the two sections of the fire-pot and the frame of the ash-pit are all securely fastened together by our famous "cup joint." Three "cup joints" in all, you see.

All sections, you will notice, fit together perfectly, and are lined with a layer of asbestos cement, which unites them so firmly together that they become, in every purpose, one solid piece of metal. Can never spring or fall apart.

And that's not all! The top of the dome is fastened to the sides with cement and boiler rivets, making the Sunshine just as smoke, gas, heat and dust tight as a steam boiler. From a hygienic standpoint it takes precedence in the furnace world.

Notice, too, the Sunshine is equipped with an automatic gas damper. This damper automatically opens when the gas in the furnace reaches a certain pressure and allows it to escape up the chimney. Eliminates all danger of an explosion or gas escaping through the registers.

Safest as well as most healthful, easiest managed, cleanest, greatest labor-saving and fuel-economizing furnace you can buy.

If your local dealer does not handle the Sunshine write direct to us for free booklet.

## DISTRICT

## BEAVER MEADOW.

The school picnic which was held in Mr. Sullivan's bush last Tuesday was enjoyed by all. The afternoon was taken up by swinging, races, and other amusements.

Miss Lewis, our teacher, expects to leave for her home at London Saturday.

Mr. John Harris is all smiles. It's a boy.

Wedding bells are ringing in this vicinity.

## The Newest and Best

**Agnes of Great Painters.**  
It is strange to notice what great ages most of the famous Italian painters reached. Spinello was nearly 100 at the time of his death, Michael Angelo nearly ninety, Da Vinci reached seventy-five, Claude Lorraine, eighty-two, Carlo Maratti eighty-eight, and the list might be greatly extended.

**How to Be Vulgar.**  
A writer in The London Mail in some suggestions on "how to be vulgar" says: "If you want to be absolutely on the safe side, wear a set of whiskers, any sort—sideboards, face fins, fangs, mutton chops, earwigs, weepers, hold-alls, let-us-prays or ear-guards—will do."

## COMMON SENSE

Leads most intelligent people to use only medicines of known composition. Therefore it is that Dr. Pierce's medicines, the make-up of which print every ingredient entering into them upon the bottle wrapper and which its correctness under oath, are daily giving in favor. The composition of Dr. Pierce's medicines is open to everybody. Dr. Pierce being desirous of having the search light of investigation turned fully upon his formula, being confident that the better the composition of these medicines is known the more will their great curative merits be recognized. Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes created with Dr. Pierce, and without the use of a drop of alcohol, triple-refined and chemically pure glycerine being used instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit-forming drugs. Examine the formula on their bottle wrappers—the same as sworn to by Dr. Pierce, and you will find that his "Golden Medical Discovery," the great blood-purifier, stomach, tonic and bowel regulator—the medicine which, while not recommended to cure consumption in its advanced stages (no medicine will do that) yet does cure all those catarrhal conditions of head and throat, weak stomach, torpid liver and bronchial troubles, weak lungs and hang-on-coughs, which, if neglected or badly treated lead up to and finally terminate in consumption.

"Take the 'Golden Medical Discovery' in time and it is not likely to disappoint you if only you give it a thorough and fair trial. Don't expect miracles. It won't do supernatural things. You must exercise your patience and persevere in its use for a reasonable length of time to get its full benefits. The ingredients of which Dr. Pierce's medicines are composed have the unqualified endorsement of scores of medical leaders—better than any amount of lay, or non-professional, testimonials. They are not given away to be experimented with but are sold by all dealers in medicines at reasonable prices."

**WHAT A PITY.**  
What is electricity? I knew last night, said the student, but I can't remember just now. Ye gods! The only man who ever knew has forgotten.

I pray, first, for good health; then for prosperity; thirdly, for happiness; and, lastly, to owe no man anything.

## THE BLACK BEAR.

Her Physic and Her Food After Her Five Months' Sleep.

The black bear has her cubs, from one to three, in her den during the months of March and April, and it is an interesting thing to know that she has the power to give birth to her young at least two weeks before the proper time if driven from her den. She will return to her cubs if let alone. In the den she cares for her young until the snows of the north country have sufficiently melted to permit of her getting about, when she "hits the trail" again. She eats nothing during the five months that she hibernates, except that from time to time she will lap the icicle which is made by the freezing of her breath on her paws. She ventures forth as soon as the snow has sufficiently melted to permit of her getting about and for several days will eat nothing but hemlock bark and certain roots, which act as a physic. When in her normal state of health again she is ravenously hungry and will diligently fish the brooks and streams in search of a dinner of trout, will hunt up the carcasses of deer or moose which have been overcome by the severity of the winter or will prey upon porcupines by quickly putting her paw under the stomach and rolling the porcupine on its back, then with a slap tear out the entrails and escape the quills.—Field and Stream.

## ANXIOUS MOMENTS.

The Quarter of an Hour Following the Winning of the Derby.

The anxieties of owners of race horses competing in the Derby do not immediately end as the horses pass the judges. The fatal "objection" may snatch the laurels from the victor. The possibility discovered itself over Caracacus' race. The owner had striven in vain to get a jockey of repute. His offer of a life annuity of £100 a year to Gostley in case of success had been declined. A stable boy named Parsons had eventually to be trusted, and, to the surprise of the learned, he got the horse home, winning by a neck. Going to scale, the lad could not draw the weight. In breathless silence the bride was sent for, and that just enabled him to balance the scale. But now Lord Stamford appeared to object that only his own horse and two others had gone the full course. The winner and the rest were already past the starting post when the flag fell. Admiral Rous looked at his watch. "Twenty minutes," he said. "An objection to hold good must be lodged within a quarter of an hour." And so the stable boy's win passed into the records, but the owner of Caracacus declared that not for £1,000 a moment would he again endure the agony of that short period following the race.—London Saturday Review.

He who speaks honestly and fearlessly what he knows and what he believes will secure the goodwill and respect, however he may fail to win the assent, of his fellowmen.

## Another Great Year for

**the Mutual Life OF CANADA.**

Gains—gains—gains in every department—is the splendid record made by this Company during the past year.

Here are the facts for 1906:—

Gains in Income . . . . \$115,904.22  
Gains in Assets . . . . 1,089,447.69  
Gains in Surplus . . . . 251,377.46  
Gains in Insurance . . . . 2,712,453.00

Such increases clearly demonstrate the esteem in which this Company is held by Canadians.

They know that when they take a policy in The Mutual Life, they become an owner of the Company, and share in all the profits.

Write for copy of the 37th Annual Statement and other valuable information, to any of the Company's Agents, or to Head Office, Waterloo, Ont.
