Extra Years of Easy Riding

Many a bright, shiny-looking bicycle is a
gay deceiver! It is merely built to sell. In a
few short months it becomes a chipped, rusty,
looking object that runs as hard as it looks.

On the other hand, C. C. M. Bicycles retain
their looks and continue to run easily for
years and years. Many in use for 10 to 20
years are still running well.

C. C. M. Bicycles depreciate more slowly than
ordinary bicycles because they are
made of better materials.

For example, C. C. M. case-hardened
bearings are so hard a file cannot cut them.
That is an assurance of extra long years of
easy running.

C. C. M. smooth, highly-polished nickel-
plating over rust-proof copper and C. C. M.
brilliant, waterproof, triple enamelling mean
a sparkling, bright finish with years of dur-
ability.

When you decide to buy a new model you can
always obtain a good allowance for your used

THE FIRST SPRAY BY APPLE GROWERS

Sprayers Should Be Overhauled
at Once and So Be
Ready for Business.

Last year the majority of Nova Scot-
ia apple growers missed the pre-har-
vest sprays on account of their spray
pumps being out of order. Practically
all intended to apply the first spray,
but when they tried the sprayers out,
they found them disabled in one way
or another. The result was that it
took in some cases weeks to get re-
pairs made and many were not able
to apply any spray until the after-
blossoms. Consequently we had
a very dirty crop, and everyone even
the men who grew clean fruit suffered
for word went to the market that the
Nova Scotia crop was dirty and clean
lots of fruit were sold at a discount
on account of the general reputation
of the crop.

Growers should get their sprayers
out at once and overhaul them so
that if any parts are worn or broken,
they will be able to replace them be-
fore it is time to apply the first spray.
In Nova Scotia, the first spray
should be three pounds of bluestone,
ten pounds of lime, one pound of arse-
nate of lime, to forty gallons of water.
For apples and three-fourths of one
pint of Black Leaf 40 to each one hun-
dred gallons of this mixture. This
spray should be applied when the
leaves are about the size of a ten cent
piece.

Where bud moths are present in in-
jurious numbers the amount of arse-
nate of lime may be increased to one
and one-half pounds to forty gallons,
and the spray applied at the highest
pressure possible, and in such a man-
ner as to drive it into every chink and
crevice of the opening buds. If only
a few bud moths are present a fog
spray is much more desirable.

NO PREJUDICE TO UNION EMPLOYEE

Legislation to Impose Severe
Penalty on Employer for
Infraction of Law.

Ottawa, April 27.—Legislation has
been drafted which is designed to im-
pose severe penalties upon any em-
ployer who dismisses or in any way
prejudices an employee either because
he belongs to a trade union, or de-
sires to become a member of such an
organization. This matter has been
under consideration by the Labor Le-
gislation Committee for some time, and the leg-
islation drafted and of which notice has
been given, though the bill is stand-
ing, will provide a penalty of one thou-
sand dollars fine or six months' im-
prisonment in the case of any party
adjudged guilty of such an offence.
Another Government bill on the or-
der paper awaiting its turn is an
amendment to the penitentiaries act,
which provides that monies derived
from the sale of convict made goods,
in place of going to the public trust,
the particular penitentiary, to be
used in meeting contingent expenses
not provided for in the estimates.

By an act which amends the ex-
chequer Court Act, the powers of the
Registrar to his motions in chamber
and so forth are reverted to an act
passed last year, and some changes
in the exchequer court and provided
a president and two puisne judges,
and also carved the powers of the re-
gistrar. The reorganization of the
court has never taken place, nor is it
imminent, so the registrar's powers
are being revived.
