

Fishermen! Here's the Boot for You-"EXCEL"!

"EXCEL"
Made 'All in One Piece'

"EXCEL"

The Fishermen's Friend

All fishermen know from experience what happens to ordinary boots when used in fishing. You've seen how salt water seems to take the life out of rubber and how the uppers crack and the soles wear through in a surprisingly short time.

The "EXCEL" is a different and better kind of boot. It has been made especially to stand up under the unusually hard use a fisherman's boot gets.

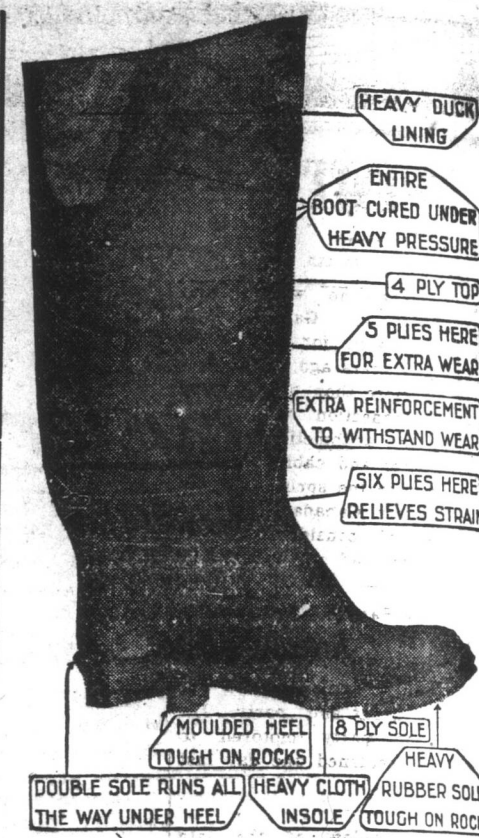

The rubber and fabric in "EXCEL" boots are of the very highest quality. But it is the special method of curing, under tremendous pressure, that makes the "EXCEL" so wear-resisting. The pressure forces the layers of rubber and fabric together so that they are actually "one-piece", without losing the least bit of the

life or resiliency of the rubber. Salt water has practically no effect on "EXCEL" boots. The UPPERS remain pliable and weatherproof, and resist the drying-out action of sun, heat and extreme cold far longer than other boots. Consequently they don't crack anywhere near so quickly. The SOLES are almost wear-proof, because they are made like an Auto Tire, with 8 plies of rubber and fabric welded by tremendous pressure into a "tire-tread" sole that rivals an automobile tire for toughness and durability.

These are exclusive features of "EXCEL" boots. The picture, at the right, of an "EXCEL" boot cut apart, with every detail of construction visible, shows how "EXCEL" boots are reinforced at every point of

strain. There is not a single feature but what has been proved necessary and desirable by tests of severest use. Your own experience will tell you that a boot with these features simply must be a better boot.

Study this picture. Learn these features. Remember them when you compare "EXCEL" boots with ordinary boots. And remember, too, that very important point which the picture cannot show, namely, that "EXCEL" boots are cured under tremendous pressure, which leaves the rubber pliable, weatherproof and wear-resisting. It is only by the use of this tremendous pressure combined with highest quality materials that the best results are obtained.

Pliable Uppers. Weatherproof and Wear Resisting. Tough Tire Tread Soles. Made "All in One Piece."

"EXCEL" Boots are sold by all reliable dealers from Coast to Coast.

TRINITY.

Upon my return to Trinity, after a very pleasant six weeks amidst old scenes, and with old parishioners in Hantsport and Port Morien, Nova Scotia, I found several letters awaiting me re the subject of Trinity Notes in the Evening Telegram. Some of the writers knew that I was away from Newfoundland, and they had written to assure me of how much they missed the weekly report, and that they hoped I would soon get to work again. This was kind of them and I thank them for their interest in it and me. Others did not know that I had been away; and though they did not say so in so many words, yet I could read between the lines that they were not a little put out about my sudden disappearance from the journalistic world. Whilst another, who addressed me as "The Trinity Antiquarian" was thankful for the past, and hopeful for the future.

Doubtless it is complimentary to Trinity, for so many people to take it for granted, that its past has been so fruitful in people and things of sufficient interest, and its present so full

of activities in the religious, social, and business world, that it is practically easy for me or anybody else, to supply interesting copy every week, and like the babbling brook, "to go on forever." Far be it from me, through lack of interest in Trinity, to disappoint such people, but "I have me doots" about the inexhaustible supply. I shall continue to do my best to keep the dear old spot in the limelight, though sometimes I fear my reports will smack of the commonplace.

I had hoped that someone else would fill up the ellipsis during my absence, as there are in Trinity, those who are in possession of facts (historical and otherwise) unknown to me, which if treated from their viewpoints would at any time be deeply interesting. I am glad to find that several interesting and interested people visited Trinity during the months of September and October, but I am sorry that the pleasure their presence gave to the people of Trinity, and the good impressions they took away with them, were not made public, as such publicity is usually accepted by our visitors, in the same kind spirit in which it is always offered; and the facts thus recorded,

are mutually beneficial to Trinity and themselves. To all such I say, come again, and we will show our appreciation of your presence by a grateful acknowledgment of it in pink and black.

With the shifting of our population hither and thither, in and around Trinity, during the last ten years, he would have been a wise man indeed, who, previous to the taking of the census could have told the number of the present population, in respect of either increase or decrease. The census, however, which has just been completed and revised, shows a decrease of ten in the total population of Trinity (including Lockston and Dunfield) during the last ten years. This is accounted for by the following figures:

Trinity, in 1911, had 493 people; to-day it has 463, a decrease of 30.
Lockston, in 1911, had 83 people; to-day it has 112, an increase of 29.
South Side, in 1911, had 66 people; to-day it has 26, a decrease of 40.
Goose Cove, in 1911, had 74 people; to-day it has 88, an increase of 14.
Dunfield, in 1911 had 193 people; to-day it has 216, an increase of 23.

In the section from Lockston to Wexman's Harbor, Smith's Sound, there has been a loss during those ten years of 388 people. This loss has been brought about by people who have left the district for other parts of the island, and for Canada, together, of course, with those who died, and a low birth rate. British Harbor has suffered most in this respect, and whilst it still has some "loyal souls and true" in its midst,--to those of us who knew it fifty years ago, there is a sense of desolation about it, and other little places that have suffered in the same way. The present total population from Dunfield to Lockston is \$99; and that from Lockston to Wexman's Harbor, Smith's Sound, is 2,100.

Many of our people, who get letters from Canada, are suffering financially, owing to the fact that the new postage on a letter from Canada to Newfoundland is now four cents instead of three. Many of our Canadian friends are not aware of this, and they put on a three cent stamp as usual. This means a two cent fine for the receiver in Newfoundland, which of course he has to pay, before he can claim the letter. One way to stop this, is for our people to have ellips printed or typed, with a re-

minder of this, and to put a copy in each of their letters to friends in Canada. We are using the following slip for this purpose, and with good effect: "Kindly take notice that postage on a letter from Canada to Newfoundland is now Four Cents."

The last time, in company with a party of visitors, I visited the Light-house on the Port Point, Trinity, Mr. Abel Rowe, the light-keeper, who so kindly took us up to the Light-room and explained the mechanism, also pointed out the defects in the plans of the structure. The room at the base of the tower, equipped for the Light-keeper's comfort during a stormy night, could not be used as such for two reasons. One was, because the back draught from the tower blowing down the stove pipe prevented a fire from being kept in the stove. The other--owing to the position of the room at the base of the tower, the person occupying it could not see the light without going out of doors. Consequently he had to go to his dwelling house, six hundred yards away, and watch the actions of the light from his bedroom window. The flaring or dimming of the light, often resulted in his having to go back and forth between the Light-house and his dwelling house five or six times a night, in the roughest of weather. No wonder Mr. Rowe is now a paralytic wreck. A series of changes have recently been made. An iron structure of lower and smaller proportions, has been placed near to and connected with the base of the old tower, to the top of which the light has been transferred. The top of the old tower will be taken down, and the

base of it will now be available for a really comfortable room for the light-keeper during a stormy night, and from which he will be able to keep an eye on the light, and regulate it without having to go out of doors. Mr. Henry Rowe, Mr. Edward Rowe's son, has been appointed Light-keeper, to succeed his uncle--Mr. Abel Rowe.

Every window in St. Paul's Church is now fitted with a strong and well-made storm window. In a country like Newfoundland, where we are subjected to such high winds, all leaded windows should be protected in this way, at the time when they are placed in the building. This protection prevents the leads from breaking, makes the windows watertight, and the building warmer. Other necessary repairs have been made to the building, and collectors have been securing from the members of the congregation the necessary funds to cover the expenses. God's House should be the best house in the settlement, and during the poorest of times, love will ever find the way to keep it in this condition. With old St. Paul's Church in his mind, Mr. William Bullock wrote the words that welled up from his loving heart:

"We love the place O God,
Wherein Thine honour dwells,
The joy of Thine abode.
All earthly joys excels."

Our actions should reveal the presence of the same love that we say is ours, everytime we sing that hymn, which now forms a part of every well known collection of hymns.

Following are the records of some marriages, and the names of those who witnessed them, which revive sacred memories of those to whom in God's great plans we owe so much:

1847. Married, George Lockyer and Mary Jones, by Rev. Bertram Jones. Witnesses: Jonah Jones, Sarah Lockyer.

1849. Married, William Crocker and Caroline Delaney, by Rev. Thos. M. Woods. Witnesses: Joseph Crocker, Elizabeth Crocker, Catherine Delaney, Sarah Clunn.

1849. Married, John Newhook and Harriet Curtis, by Rev. Thos. M. Woods. Witnesses: William Pilgrem, David B. Grant.

1850. Married, Henry Bartlett and Catherine Guppy, by Rev. Thos. M. Woods. Witnesses: Charles Field, John Guppy.

1850. Married, Aaron Bugden and Dinah Miller, by Rev. Thos. M. Woods.

Witnesses: William D. Cross, Benjamin Bugden.

1851. Married, Robert White and Esther Mayers, by Rev. Thos. M. Woods. Witnesses: G. W. Gent, W. H. Cross.

1853. Married, Richard Pelly, of Hant's Harbor, and Mary Ann Green, of Scilly Cove, by Rev. W. G. Crouch. Witnesses: Charles Granger, Charlotte Granger.

In looking over those entries after recording them, I find there is to-day only one person living of those whose names are found in them, and that person is Charlotte Granger, now Charlotte Morris, of Whitney Pier, Sydney, C.B.

Little Miss Frances Baird, of St. John's, is spending a delightful time at the Anchorage, Trinity.

Mr. Tuff, representing the British Import Co., registered at Garland Hotel, and called on his customers last week.

Magistrate Somerton paid an official visit to King's Cove, Keels, Red Cliff and Open Hall, and reports unprecedented destruction and desolation along the seaboard, as a result of the storm and tidal wave.

Mr. Shepherd, a first year Divinity Student of Queen's College, St. John's, is doing Lay Reader duties in the parishes of Trinity East and Champneys, till the new rector gets back from England. His services are fully appreciated.
