A Chicago dispatch says that the Canadian Faoife Railway Company has acquired possession of the elevated railway which is nattially completed into the heart of the city. The purchase includes not only the right of way and the work already done, but also the stock of the company formed to build the elevated road. The idea is to have a great through line from New York to this city in operation before the World's Fair opens. Practically the greater portion of this through line is now finished and in operation. The Canadian Pacific has connections which give it the right of way over the shortest route between New York and Suspension Bridge. From there to Woodstock, in Ontario, it has a line projected which will connect with its own road at Woodstock for Detroit and thence on to Chicago. That projected line must be gone on with at once it the through connection is to be secured independent of rival roads, and it is said here that work on it will not be delayed any longer.
