OUTLINE OF HISTORY

THE government of these Greek arch and claimed the authority of a "city states" varied very widely its nature. As they settled down feer their conquests, the Greeks stained for a time the rule of their lings, but these kingdoms drifted ack more and more to the rule of the aristocratic class. In Sparta (Lacedemon) kings were still distinguished in the sixth century B. C. The Lacedemonians had a curious system of a double kingship; two kings, drawn from different royal families, ruled together.

But most of the Greek city states and help the finds and uses for his own ends.

Tyrants were distinguished from kings, who claimed some sort of right, some family priority, for example, to rule. They were supported, perhaps, by the poorer class with a grievance; Pelsistratus, for example, who was tyrant of Athens, with two intervals of exile, between 560 and 527 B. C., was supported by the poverty-struck Athenian hillmen. Sometimes as in Greek Sicily, the tyrant of Athens profoundly.

Rodman used this drawing-room for a workshop. He kept it close-shuttered and locked. Not even this big, yellow, servile creature who took exclusive care of him in the louse was allowed to enter, except under Rodman's eye. What he saw in the final scenes of the tragedy, e saw looking in through a crack under the door. The earlier things he noticed when he put logs on the fire at dark.

Time is hardly a measure for the activities of the mind. These reflections winged by in a scarcely per-ceptible interval of it.
