A SUM FOR SIR RICHARD.

It is only the belated portion of the pub. lic who would wish to go back to the

people, destroying their prospects and making lamentation and woe amongst electric light. That at Halifax lately has stage a bunch of violets that he had in his making lamentation and we amongst them, how soon would not the country side be aroused to drive back the invaders and expel them at whatever cost. Yet it is the fact, that though not recognized by most, such camps of destroying forces are always in active operation amongst us, cutting off the young as well as the mature, leaving gaps which can never be filled up, ruining the interests on which the happi-ness of thousands depend. The local medical men do what they can to combat these onslaughts, and mitigate their effects-But it is erident that they cannot go forth

The organization that goes by the name of "the government" could de vote itself to no worthier nor more neces-sary work than to act promptly and thoroughly upon the lines that have been indicated. Seeing that the health of the people is necessary to its prosperity and happiness, it is surprising that it has not been made the care of a special department, which, aided by a corps of assistants, would be able to face the enemy in its chosen haunts, and hunt it to defeat. Tobacco has been grown experimentally a legal journal contends that tobacco-grow-ing is absolutely illegal by statute. The truth seems to be that in the reign of Charles It two statutes were passed expressly for-bidding tobacco culture in Great Britain, under a penalty of \$50, subsequently in creased to \$200 per rod planted. These Acts were framed solely for the benefit of the American column.
