Confederation in Nova Scotia.

The Halifax Cclonist makes a strong and sensible appeal on behalf of Union men as representatives of the Province in the Canadian House of Commons; and, at the same time, affords us some exceedingly interesting information as to the mental, moral and political status of the enemies of Confederation. Our cotemporary says:-"The Union now is an accomplished fact. It is both our duty and our inerest to make the best of it—to work out its capabilities to the best adrantage. And this can be done to the est purpose by its friends, not by its that failure will be a thousand times more complete, if it break down in the hands of those who have moulded and nursed it with so much care and anxiety. We may depend upon it, hey will do their utmost to make it effect all that they have promised, vere it only for their own sakes. the interests of its opponents would e in a direction quite the opposite. As lovers of our country which ought re to prefer? There can scarcely be we opinions. But when we look a stile more nearly into the matter t the personnel of the two parties, e difference becomes still more riking, as to whom we are to conder "the best men." If we look on the political history of the last en years, and pick out the flower the public men of both parties! of ose who survive, how many can be aimed by the Anti-Union party? It

On Saturday last, however, a gentleman doing business on or Burrard Inlet, was Fort street, received a letter of late date from harbor last evening. the reported dead man, who, from his vigor-ous style of writing, would lead one to suppose that if he really be dead he has not yet become aware of the fact himself, and being the party most interested, it is reasonable to suppose he would have the earliest information on the subject.

THE PRICE OF GAS .- A movement is on foot among the consumers of gas to procure a reduction in the price of the illuminator. It is stated, we believe correctly, that gas is higher here than elsewhere, and that notwithstanding coal costs much less at Victoria than at San Francisco, the rates charged by our gas company (\$7 50 per thousand feet) is far in excess of that imposed at the Bay City. The promoters of his movement, failing to induce a reduction in the rate, will pledge themselves to burn coal oil, which, it is claimed, even at \$1 per gallon, is one-third cheaper than gas. The feeling is general, that a considerable reduction, in view of the hard times, ought to be acceded to by the Company.

PERFORMANCE AT THE THEATRE.-The performance at the theatre on Saturday evening was largely attended, and gave the greatest satisfaction to those present. Miss Virginie's acting was received with her singing and banjo solos threw the nemies. If it is to be a failure, then house into raptures. ALL PLAY AND NO WORK!

It is indeed high time that the Imperial and Royal visits to Paris should come to an end, for the arrivals of Czars, Kings, Sultans and Viceroys succeed each other in such rapid succession that the Parisian is being constantly called away from his work to assist at either the reception of some potentate at one of the frequent manifestations of approbation, while railway stations, or at a review or some other festivity got up in honour of the numerous sovereigns who this year visit the most beautiful capital in the world, thanks to the untiring efforts of Baron Haussmann.
