Referring to the advertisement of this association in The World of Tuesday last, it may be explained that the much larger sum called for by the valuation made by Professor Cherringan, under the government standard for Canada, than is required by the valuation made by Mr. Homans on the standard for the STATE OF NEW YORK, arises solely from the greater severity of the Mortality Table of the Institute of Actuaries of Great Britain as compared with the "American Experience" Table of Mortality, as the same rate of interest was used in each case.

The reason why the valuation made by this Association's own actuary CALLS FOR A STILL LARGER RESERVE than even that required by Professor Cherriman's valuation arises from the fact that the directors consider THAT SECURITY TO THE POLICY HOLDERS is the FIRST thing, and, therefore, not content to provide simply as in other companies, they add an additional TEN per cent to the liability under all BONUS ADDITIONS and PAID UP assurances as well as those being paid up, such as TEN and FIFTEEN payments.
