The King of England

(New York Herald) Here are a few intimate facts about England's King presented in tabloid form.

He is fifty three years old. He has six children, five of them boys.

He is one of the best wing shots in the world, an expert navigator, an authority on men-o'-war, and domestic in his tastes.

He hates classical music and likes sprightly melodies. He has the best collection of babies' photographs.

He makes the collection of postage stamps a hobby. He goes to the people of the humble sections and carries sincere messages of good will to them.

Bob Lowry's Ledge

There are 80,000 people in San Francisco who were born in Germany and more than 30 of them had the name of Kaiser.

All of these have changed their name to King. Nearly all of the German Jews have assumed Irish names and hardly a German restaurant now exists under its former name.

In that city even a substitute is being used for sauerkraut, although Schlitz and Budweiser have not yet adopted an alias.

Some think that limburger cheese would smell more sweet under another name but the Huns are not guilty in this respect.

Limburger was invented in Holland by a genius who thought that it would drive evil spirits from breaking into grocery and other stores.

It is also a sure remedy for the odor that comes from eating onions or drinking the common rye whisky of other days.

An Opportunity to do Something

Do you know a Mother whose son has bought with his life on the battle field of Europe the liberty you enjoy? If so, it is your privilege to name that mother for decoration in the International Order of Allied Mothers in Sacrifice.

The Associated Kin has made her nomination by her friends an incident to her decoration and it is a privilege accorded to all who know of such a one, to pass that knowledge on to the Associated Kin Headquarters London.

They do the rest as a patriotic privilege on behalf of the people of Canada.

This great movement originated with the Associated Kin and to them is due the honor of having promulgated their proposition throughout the entente until mothers in practically all its major nations are wearing this ensignia to what is admittedly at once the most exclusive and the most democratic order of womanhood and sacrificial motherhood that is, or will be.

During the first week of September what will undoubtedly be the greatest gathering of sacrificial motherhood ever assembled under one roof will take place in Bond Street Congregational Church, Toronto. This time is chosen that mothers from a distance who are visiting the Canadian National Exhibition may receive the ensignia of the International Order of Allied Mothers in Sacrifice. This will be the second decoration meeting held in Toronto this year.

Following it at Kinsman Hall, London, a similar meeting, the fifth in London, will take place. Each of these meetings will be addressed by a speaker chosen by our overseas heroes and a program in every way appropriate to the occasion is assured to those who attend.

We trust the friends of mothers within the scope of our circulation will see to it that this distinction be conferred on every mother whose soldier son has made the supreme sacrifice. To such of these mothers as are shut in through physical disability the Associated Kin ask local co-operation and volunteer special attention to their decoration in their homes. Where the Associated Kin is organized, particulars should be handed to the secretary to send forward. In other places send full information direct to Head Office, London, Ontario.

AN OIL THAT IS PRIZED EVERYWHERE.—Dr. Thomas' Electric Oil was put upon the market without any flourish over thirty years ago.

It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this hemisphere. There is nothing to equal it.
