THE HOUSEHOLD

A COOKERY COLUMN.

Recipes For Warm Days - A Fruit Punch.

A fruit punch that makes a refreshing summer beverage may be made as follows: Boil one pint of water with a heaping cup of sugar for five minutes. Into this stir a cupful of minced pineapple, one of strawberries, one of maraschino cherries and one of white grapes. Add six unpeeled and thinly sliced oranges, four thinly sliced lemons and one cucumber peeled and cut into dice. Stir in two cups of claret, a tablespoonful of maraschino and, if desired, a half pint of brandy. Let it stand for two hours, then pour over a lump of ice in a punch bowl and permit to stand at least an hour before serving. If too strong add any kind of effervescent water desired.

Wine and Cheese Salad.

An appetizing and palatable dinner is made of cream cheese. Roll the cheese into little balls with butter paddles, heap the balls on lettuce leaves or endives and pour French dressing over them. A rather more elaborate salad is made by mixing with the cheese minced parsley and paprika, mounding the mixture in little egg cups and placing on ice to chill. Serve on lettuce leaves with mayonnaise dressing. Still another way of serving the cheese balls is to line small tinned tinbake molds with aspic, then, when this is set, place in the center a ball of cheese and on the cheese a stoned olive filled with aspic. When serving turn on to a dish and place about the cheese mounds celery finely minced and mixed with mayonnaise dressing.

A famous German cookbook contains a recipe called windbeutel, or in English "windbags." A more graceful name and one just as appetizing would be "wind puffs." For these puffs use half a pound of butter, half a pound of fine flour, the same weight in water and eight newly laid eggs. Clarify the butter and let it come to the boiling point with the water. Then gradually stir in the flour until the mass cleaves from the sides of the pan. Remove from the stove and allow the puffs to cool a little. Flavor slightly with nutmeg or grated lemon peel and begin to beat the eggs through and through it with a steady motion. Put the mixture on to a well buttered plate and divide it into cakes the size of walnuts.

Orange Salad. Select four oranges for this salad or use sweet ones liberally sprinkled with lemon juice after they are sliced. Cut the oranges in thick slices, carefully remove the seeds, arrange the slices in rows and turn over them a dressing made of one tablespoonful of lemon juice to three of oil, with salt, pepper and paprika to taste. This salad is a welcome addition to game.

French Tart. Cook one pound of finely chopped rhubarb very rapidly with sugar and a little water. Add a squeeze of lemon juice. Line a round tin with good short pastry, fill it with rice and bake. When the rhubarb is cold pour it into the pie, cover with a lattice-work of a few narrow strips of pastry and put a fancy rim to the tart, brush over with beaten white of egg and bake till the strips are ready.

The Petticoat. The most fashionable petticoat of the moment has a deep, founce of net or eyelet embroidered lawn. The founce may be made up of insertions and tucks, of lace and embroidery insertions alternating, or it may be frilled. But in all cases it covers the side foundation, to which it fastens by means of two lace headings (one on the skirt and one on the founce) threaded together with ribbon. A deep founce can be cleaned indefinitely, or there may be any number of founces of as many kinds with which to vary it.

Handy Home-made Satchel. The little commodity illustrated here will be found to be a special use when visiting the seashore. It is a little satchel made in linen with a back of cardboard. Its use is to carry note paper, envelopes and pencil or pen, the fat board underside forming a novel and useful little kneed desk. By its use letters can be written with comfort while sitting by the sea without fear of paper and pens going astray. The satchel itself is finished with a neat flap and is fastened by string in a bow the two strands of ribbon. A handle

may also be made, as shown. This latter is made of ribbon on a neat band of canvas or linen. The interior of the bag may be divided into compartments, one for pens and pencils, another for envelopes and yet one more for note paper. The exterior of the satchel, too, may bear the initials of the owner worked in some fancy stitch, and if further embellishment is needed a spray of flowers, worked in mercerized cotton, might find a place on the lower part of bag. The finished article will be found to be compact, of very little weight and quite easy to carry.

Washington, Aug. 30. - The body of Mrs. Aguelina J. Johnson was interred at Falls Church, near here, yesterday afternoon. Mrs. Johnson was 55 years old and weighed 500 pounds. The casket was the largest ever made in this city. It was 6 feet long, 34

Bowel Troubles of Childhood

It is impossible to exaggerate the value of FRUIT-TIVES as a medicine for children. They contain no alcohol - no morphine or cocaine - no dangerous drugs of any kind. Fruit-tives are fruit juices - concentrated and combined with the most valuable tonics and internal antiseptics known to medicine.

Fruit-tives are free of calomel, opium, senna and the host of violent purgatives that simply act by irritating the bowels. Fruit-tives are made from fruit and contain no sugar, and are so mild in their action that they never gripe or pain.

During the summer, when children are so apt to eat improperly, mothers should have a box of Fruit-tives always handy. At the first sign of Diarrhoea, Indigestion, Headaches, Biliousness, Peevishness, Vomiting - give Fruit-tives according to directions. These simple fruit liver tablets will instantly correct faulty digestion - clean and sweeten the stomach - regulate the bowels, invigorate and strengthen the whole system, and the little ones can quickly throw off the temporary illness.

Get a box now - to-day. 50c. a box or 6 for \$2.50. Sent on receipt of price, if your druggist does not handle them. FRUIT-TIVES LIMITED, OTTAWA.

SUMMER FIREPLACES.

How They May Be Transformed Into Things of Beauty. The fireplace in summer is an almost tragic feature, with its neglected, rather neglected air, and most people are glad to induce it to hide as much as possible of its diminished head. We do not want to be reminded that all things pass and that we shall scarcely have begun to enjoy the summer ere we realize that it is nice to see a fire again, "just for the evenings."

The degree of summer disguise needed by the fireplace depends on its nature. The modern fireplace, with deep tiled recess, wants little but a bowl of cool greenery stood in the center. The

A DECORATIVE FIREPLACE. black headed abomination, however, which survives in too many houses is a more difficult customer to manage. Half measures are of no use here, and the thing must be either left in its native ugliness or means must be adopted to cover it almost entirely.

A New Idea. A wooden cabinet covered with tapestry of an indefinite leafy design may be planned to fit into the large square opening, and the lines of the broken up by pots of ferns. Once started, these groups can be kept up with a very few additional touches all through the summer.

An Oriental Suggestion. A large Calene brass tray is another thing which goes far toward mitigating the plainness of the summer fireplace. This can be flanked in various ways by a couple of scrolly iron stands bearing plants, supporting jars of foliage or, as is shown in the sketch, by two tall cylindrical pots. These latter can be filled with trails of Ivy and periwinkle, with large fronds of fern standing up in the center, or, less troublesome still, they can be planted with marquette daisies or Ivy leaf geraniums.

Culture Notes. The new summer coiffures free quite the prettiest and most becoming that Dame Fashion has been pleased to bestow upon us for some time. The hair is most apt to be dressed high and is

once more waved, the fashion for straight locks having passed. The hair is waved now in large waves, nothing small and crinkly being allowed or approval by the woman of fashion. In the sketch of new coiffure modes is a dignified manner of hairdressing for elderly lady. The hair is waved and gathered from the brow over pads to match the hair,

DAINTY STYLES. then the whole effect is completed with a coronet plait and a high tortoise shell comb with a design of lovers' knots in silver.

The coronet plait can, needless to say, be made up of hair combings to match the hair, and this innocent deception can well be pardoned, especially in the case of very scanty locks. Many young girls use a plait of hair made of their own combings, the use of such small aids to a successful appearance being pardonable where nature has not been lavish with her gifts. Hair combings can be made up by almost any hairdresser for a small sum.

A very dainty coiffure for a young girl is pictured, the hair being dressed low, with one curl on the shoulder and a single rose nestling behind the ear. In the center of the picture is a pretty coiffure with the hair dipped in the center and padded out a little at each side, then the hair on the top is arranged in curls, and large black bows at the back of the head and neck complete the effect. This coiffure is particularly suitable for a tall girl.

With the tremendous popularity of the empire dress for day and evening wear empire headresses are very popular. A lovely design is favored with large puffed curls at the sides and a high empire comb.

To Obtain a Good Complexion. Don't drink tea or coffee. Drink pure water. Eat grapes, apples, raisins and figs. Eat a few salted almonds daily. Don't eat animal food. An egg or two a day, soft boiled, instead of meat. Eat an orange every day or so. Walk two or three miles a day. Bathe the whole body daily in tepid water. Don't fret; don't worry; be calm and quiet.

SOME FIRST OCCASIONS.

Cannon and small arms were introduced in 1590. Spinning wheels came to the rescue of women in 1520.

The first stereotyping was done in 1815 in New York. Shirts resembling those now worn were in use in 1850.

Phrenology, "discovered" by Franz Joseph Gall, a Viennese physician, in 1795, became a so called science in 1805.

The first submarine telegraph wire was laid in this country from Governors Island to the Battery in New York, laid in 1842.

Double entry bookkeeping was first used in the mercantile cities of Italy, notably Venice and Florence, in the fifteenth century.

Schwartz invented gunpowder in 1328. But Roger Bacon, a thirteenth century alchemist, gives a recipe for it in a work of his in 1270.

Natural Wells in Yucatan. Since Yucatan, where the Mayas built their strange cities, is a coral limestone formation, it would, says a writer in Records of the Past, have been a barren desert but for its subterranean rivers and the cenotes, or water caverns, which give access to them. The Mayas noted the courses of the underground streams and built their towns round the cenotes. Many cenotes are now found surrounded by ruins and fine indications of the methods employed by the Mayas to reach their cool waters. In Uxmal a cenote about forty feet deep is inhabited by a peculiar species of fish. At Bolanchen there is a cenote having five openings in the rocks at the bottom of the cavern. Ladders made by tying tree trunks together lead down a total distance of 1,400 feet, but the perpendicular depth from the surface to the waters is not over 500 feet.

The Mixture in Roumania. Roumania is inhabited by a bewildering variety of races, but whether of Greek, Slav or Teutonic lineage, the modern Roumanian makes it a point of honor to claim descent from the colonists whom Trajan planted in the conquered province of Dacia A. D. 107. Calling themselves Romul and their language Romule, the proud citizens seldom draw out a legal document without some allusion to their founder, whom they style "the divine Trajan." The Roumanian language reflects the composition of the race and now but faintly suggests the language which Trajan spoke.

Tennyson's Gruffness. Apropos of Tennyson's gruffness is a story repeated by the London Chronicle. Tennyson, in his last days gave audience to an American, a friend of Longfellow and Lowell, who came armed with credentials. "I hope you don't write," was the cautious old poet's first remark. "No, my lord, and I don't talk," was the swift reply. This response set Tennyson at his ease, and he let the "helped," to his guest's vast contentment.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of Dr. J. C. Fitch. In Use For Over Thirty Years CASTORIA. 100 DROPS. Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of INFANTS, CHILDREN. Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral.
