

THE WHYTE RAILWAY SIGNAL COMPANY LIMITED

**THE HIGHWAY
CROSSING SIGNAL
WITH THE
ILLUMINATED
SIGN**

**THE SIGNAL
WHICH GIVES
PROTECTION
DAY AND NIGHT**

RECOGNIZED as the most complete crossing signal manufactured to-day.

IT GUARDS the crossing twenty-four hours daily.

SAVES the railroads expense of crossing accidents.

PERMITS a higher rate of speed of trains with less danger at the highway.

BENEFITS the public by giving warning of approaching trains.

GIVES both audible and visible protection day and night.

AUDIBLE Warning given by a large vibrating electric gong.

VISIBLE Warning given by an illuminated sign, also a red light which shows up and down the highway.

OPERATION is entirely automatic by approaching trains only.

IT CAN BE ARRANGED so that operation will cease when front trucks of the engine or rear trucks of last car reach the crossing.

Our Type B. Signal

WE AIM TO SUPPLY MATERIAL ACCORDING TO RAILWAY
SIGNAL ASSOCIATION SPECIFICATIONS
