A NEW FAMILY MEDICINE.

VALUABLE SPRING & FALL PURIFIER

DR. BUCHAN'S

### TONIC BITTERS.

This medicine is recommended by the first Physicians of Europe and America as the most appropriate and truly laminess, yet successful general Family Medicine excininented. It corrects disorders of the digestive and portal organs, removes obstitute constitution, promotes a proper trentation of the blood in the extremities, strengthens weak erices, renders the mind cheerful and the body active, inspected and extendibles healthy regularity through us the whole ayatem, more speedily than any other medicine ever offered to the public It prosesses at the properties of Sarsaparilla, including SALSAPARINE, which valuable medicinal property was entirely bot till now, by the unertentific process adopted in the manufacture of Sarsaparilla preparations. The absence of Sakarakukk in all the infilterio advertised preparations of Sarsaparilia, clearly accounts for the entire want of public confidence in the virtues of Sarsaparillas, in addition, the purifying and other Hygenic virtues of various valuable productions of the vegetable kingdom, in the purest and most concentrated form. It is an alterative of great value.

The preparation nets most kindly on the liver and mucous membranes, corrects and prevents acidity, aids assimilation where greaty articles are used as foad, and is smitable to every kind of constigation, complexed with detective hillary secretions, nothing can surpassift constipation with humorrholdal tumours about the verge of the anus—other scae pites—and especially so in that which accomplanes all vanicles—and especially so in that which accomplanes all vanicles—in constipation connected with long continued de rangement of the bilivra system, termed bilians dyspeptia, it will be found a viluable emenagegue where constipation is the tonal antivituable medicine as well as in the constipation of the convalencent stage of fever, when the piteral has begun to take lood, it is of great value in preventing religions, by regulating the functions of the blowels of the sedentary, who are generally more or levs of a co
