This remarkable statement to which we direct special attention, is from a Tennessee farmer. My age is 63. I suffered intensely from Catarrh 10 years. Had intense headache, took cold easily, had continual roaring and singing in my ears. My hearing began to fail, and for three years I was almost entirely deaf, and I continually grew worse. Everything I had tried, failed. In despair I commenced to use the Aerial Medication in 1888, and the effect of the first application was simply wonderful. In less than five minutes my hearing was fully restored, and has been perfect ever since, and in a few months was entirely cured of Catarrh. ELI BROWN, Jackboro, Tenn.

JACKSONVILLE, Fla.,  
18th August, 1894.

To whom it may concern—and that is nearly everybody.—This is to certify that I have used Coutts & Sons' "Acetocura" on myself, my family, and hundreds of others during the past fifteen years for headache, toothache, rheumatism, sciatica, sprains, cuts, boils, abscesses, scarlet fever, chills and fever, and also with good success on myself (as I was able) in an attack of yellow fever. I can hardly mention all the ills I have known its almost magical power in curing, such as croup, diarrhoea, biliousness, and even those little but sore pests to many people—corns. The trouble is with patients, they are so fond of applying where the pain is—and not where directed, at the nerve affected. And the trouble with the druggists is that they also want to sell "Something just as good," which very often is worse than useless.

Wishing you every success in your new establishment, and that a more enlightened public may appreciate the blessings of your Acetocura, is the fervent wish of

Yours truly,

CAPT. W. M. SOMERVILLE,

Late of U. S. Engineer Service, and formerly of the Marine Department, Canada. To Coutts & Sons, 72 Victoria st., Toronto.

The grape crop suffered much from the drought of August. In some localities it dried up the juice, and in others so increased the sugar that many grapes intended to be made into dry wine will have to be converted into sweet varieties or distilled into brandy.—*New York Evening Post*.
