

Gall-fly.—With the exception of a little rufous on the joints of the feet and on the base of the mandibles, the colour is deep black. *Head* finely rugose, face with two parallel grooves and median ridge, antennæ 14-jointed, 3rd joint as long as 1st and 2nd or 4th and 5th united; ocelli well separated and inconspicuous. *Thorax* glabrous above, parapsidal grooves very distinct and extending to the collar, scutellum rugose, with basal groove, mesopleuræ smooth and glabrous beneath the wings. *Abdomen* shining, black, without sculpturing, the posterior margin of the 2nd segment quite oblique. *Wings* long, hyaline, beautifully iridescent, nervures slender. *Feet* black, tibiæ set with a very fine gray pile. Length, $2\frac{1}{2}$ mm. Wings, 4 mm.

Described from one bred female.

(To be continued.)

CORRESPONDENCE.

LITHOPHANE ORIUNDA.

Sir,—Two localities may be mentioned additional to those given by Mr. Moffat in July (1893) number.

Mr. Grote has recorded Wisconsin as a habitat of *Oriunda*, and I can say that a single specimen was collected at Galena, Illinois, Sept. 26, 1875, from a sugared tree. THOMAS E. BEAN, Laggan, Alberta.

Sir,—I wish, on behalf of the Entomological Society of Ontario, to acknowledge the receipt of a contribution to the Society's collection of native Coleoptera, from Mr. A. H. Kilman, of Ridgeway. It consists of over a hundred and fifty species that were wanting in the Society's cabinets, all nicely mounted and in fine condition.

London, May 16th, 1894.

J. ALSTON MOFFAT, Curator.

IS CÆNONYMPHA TYPHON SYNONYMOUS WITH C. INORNATA?

Sir,—Will American entomologists who are acquainted with the European forms of *Cænonympha typhon*, especially with vars. *laidion*, Bork, and *isis*, Tett (probably identical), inform me whether *Cænonympha inornata*, Edw., is a distinct species or is identical with these varieties? From the descriptions, I incline to the latter view, but an inspection of some specimens of the American insect in the British Museum (Natural History), not very first-rate ones by the way, rather lends countenance to the former.

F. I. BUCKELL, M. B., 32 Canonbury Square,
London N., England.
