

symptoms which guided me to select the following prescription as being the best medicine for him :

R. Magnes. sulph .....	℥ iv.
Potass. acetas .....	℥ iss.
Tinct. buchu .....	℥ ss.
Tinct. hyoscyami .....	℥ ss.
Aqua, pure .....	℥ iii.
Ft. mist. Sig.: 3 tis horis sumend.	

He was given the above prescription thrice daily for two weeks continually. He did very well under it. Almost all his old symptoms disappeared, but new ones appeared in their place. He began to complain from the beginning of June of soreness over the pubes, and passed urine in a thin stream mixed with pus. I stopped the prescription and gave him the following medicine:

R. Stearn's hæmoferrum (liquid) .....	℥ i.
Aqua, pure .....	℥ iii.
Ft. mist. Sig.: 3 tis horis sumend.	

Above prescription was given thrée times a day for nearly a week, when these symptoms disappeared and the fistula also completely closed. I should candidly state here that when I took up this case I had not the remotest idea of curing the fistula permanently. My idea was that the patient would be relieved of his troublesome symptoms, especially the painful pimples on the scalp. This is an illustration of what hæmoferrum can achieve where formerly surgical interference was the only resource.

I remain, sirs, yours very respectfully,

S. B. SHROFF.

Messrs. F. Stearns & Co., Detroit, Mich., U.S.A.

#### BIRTH.

On May 19th, at Unionville, to Dr. and Mrs. J. Watson, a son.
