MANY READERS DON'T REALIZE

.....what it means when they are told that an important company, which classifies its business in two sections, has had a mortality of 56.3 per cent of the expectation in its **Temperance Section** and 80.3 per cent. in its **General Section** on the average for a period of fifteen years.

It means simply that only \$563 was required to pay expected losses of \$1,000 in the Temperance Section, while \$801 was required in the General Section, *i. e.*—there was a saving of \$437 on each \$1,000 in the one case for profit and a saving of \$199 in the other.

This is the actual experience of **The Sceptre Life** which follows the same lines as the **THE TEMPERANCE AND GENERAL LIFE ASSURANCE COMPANY**, which is the **TOTAL ABSTAINERS' COMPANY IN CANADA.**
