⁽¹⁾ Activities to be covered by a ban on development, production and stockpiling of chemical weapons. The time required for production and stockpiling may vary depending on the agent and quantity envisaged.

⁽²⁾ E.G., studies, doctrine evaluation, manual writing.

⁽³⁾ Higher staff training, preparations for training of the units of the armed services which are to deliver chemical charges.

⁽⁴⁾ Not protective training alone but for specialized activities. like donning protective equipment when handling munition, varying transporting routines for different kinds of munition, training particular flight manoeuvres at take off and landing depending on
