FALL HOUSE CLEANING IN THE POULTRY YARD

By R. R. Hannas-

Clean the Flock, Too.

An Ontario dairy farmer recently fur-

nished an example of the results that

accompany liberal feeding at this time of

the year. He is a breeder of registered

Holsteins. A few years ago, he says, one

the winter was allowed to pull thru on

feeding. She freshened in due time, was

entered in record of performance, and

FLORAL POINTERS

Plant peonies or rhubarb as soon as the

ops turn yellow and drop over.

HARVEST HELP NEEDED.

Just at this time of the year, when and everything is in readiness for the the poultry keeper is ready to begin a new year, when the old birds are about to be disposed of and the new birds or pullets placed in the laying houses for their first year's work, the poultryman turns over a clean page in his account book and is leady for whatever the year may briug forth. Why not also start the poultry year with a clean house and yard?

I asked if his cleaning stopped there. "Not a bit of it," he said. "It extends to the yards also, You may think my yards look clean, but as a matter of fact I do not consider them clean till I have plowed them up and sown some crop to supply green feed and a scratching place for the birds in the spring. Wheat or rye do very well, giving a luxuriant growth and arriving the cellar or some other place where they care the commencement of winter, dig two or three roots, lifting them with as little damage as possible. Put these roots in an outside shed or somewhere else where they will freeze sold but will not be buried with snow. After they have been frozen doors, put them into the bottom of barrels, filling in around the roots with spring. Wheat or rye do very well, giving a luxuriant growth and arriving the cellar or some other place where they could but will not be buried with snow. After they have been frozen doors, put them into the bottom of barrels, filling in around the roots with spring. Wheat or rye do very well, giving a luxuriant growth and arriving the cellar or some other place where they are they are they care they care they care they are they care with a clean house and yard?

The value of giving the houses and yard?

The value of giving the houses and yards a thoro cleaning was explained by an experienced poultryman with whom I talked recently.

"I find it almost a necessity to "I may be asset to take the pullets just coming in side."

whom I talked recently.
"I find it almost a necessity
start my pullets off in the fall wholesome surroundings." fall cleaning very important, for, busy season. be traces of disease and vermin from the previous season's birds, I like to see my pullets that I've spent the whole rearing season to bring to majority, go into a clean building and to know that they are given a good start."

I asked him just how he went about his house cleaning.

"Well," he said, "I generally remove everything that can be moved in the house, taking all these movable parts aside from the fact that there may

house, taking all these movable parts apt to be sick again and will prove out in the sun. Perhaps I should have told you that I choose a bright, sunny day for my cleaning process. I of high vitality, such as erect cartiers and the sun and the sun of the then brush all these parts, such as riage, bright eye, and bright, healthy-periodes, nests, hoppers and drinking looking comb, should be retained as fountains or pans, and scrup them with warm water and oap. This pro-

preparations gave satisfactory results be extended to the new birds or pull-

"After all the fixtures are taken care of, I remove the old litter and sweep of, I remove the old litter and sweep out the house, 'for further orders,' brushing down cobwebs and getting into corners, cracks and crevices. Next I supply a liberal dose of disinfectant, lossed the supply and supply a liberal dose of disinfectant, lossed the supply and supply a liberal dose of disinfectant, lossed the supply and supply a liberal dose of disinfectant, lossed the supply a liberal dose of disinfectant, lossed the supply and supply a liberal dose of disinfectant, lossed the s using a fine mist spray and getting into every place that could possibly harbor vermin. It doesn't cost anything to be too careful and sometimes saves a big loss later on. If for any reason I carnot chief a save a big loss later on. If for any layer. reason I cannot obtain a commercial

litter. The fixtures are then replaced difficulties arise this year.

TONE IS FIRMER

GROWING RHUBARB DURING THE WINTER

Fresh rhubarb during the middle of the winter is easily obtained by any-one who has a few spare rhubarb roots in his garden.

Just as the ground is about to freeze at the commencement of winter, dig

because the pullets just coming in from the range are very wild and will get thru or over anything if they are given half a chance. Then, too, if the shoots as it would during the next clean, wholesome surroundings, ne said. "I plan to give my chicken houses and yards a thoro cleaning at labor will be saved in the spring, altho, to be sure, holes are apt to be opened spring—but especially in the fall; I never miss cleaning in the fall, altho to the severe weather. However, if the fences are fixed properly in the spring, owing the same approach to the severe weather. However, if the fences are fixed properly in the seven to the severe weather. The amount of earth surrounding the root is not very important, as the growth is largely independent of any feeding upon the soil. I do occasionally in the spring, owing to the rush of work. I consider the fall, much time will be saved in the material for the shoots being taken

with warm water and cap. This process is followed by a thoro spraying, after which they are left to dry in the sun until the house is ready for them."

Use Plenty of Spray.

In reply to my inquiry concerning the materials to be used as sprays, he replied that nearly all the commercial preparations gave satisfactory results

with warm water and cap. This processes, low fer-lifty in the eggs that do hatch will result in weak and scrawny-looking chicks. The four the proposition of the proposition of the proof that the pulle's. So don't sacrifice probable profits from the pullets for impossible profits

ets, weeding out all the poor-appearing ones—that is, those that do not

reason I cannot obtain a commercial disinfectant, I use kerosene on the droppings boards and roosts and give the house a coat of whitewash.

"The house is then given a chance to dry out and air thoroly, after which clean, fresh litter is put on the floor feed as he is permitted to get; it generally use rye stray, because I have lots of that on hand. I believe rye straw and wheat straw make the best litter. The fixtures are then replaced on the floor and that is the cotton on a frame for one of them and leave the window open all winter. Fresh air is an excellent germ killer. Empty all the hoppers and fill them with fresh material. Thoroly cleanse the drinking fountain with boiling water and a disinfectant. After this is done put fresh straw in the nests and on the floors and the house.

SUPPLEMENT THE PASTURES TOO MUCH BUTTER IN COLD STORAGE

of his good cows due to freshen during That Certain Firms Are Hoarding Emphasized in Cost of Living Report.

made 14,000 lbs. of milk during the year. The second summer, being under officiat Ottawa, Sept, 13 .- The cost of livdisappearance of corn here, good enough tion along with pasture. When she minister of labor, a report concerning

in grade to be delivered without penalty on September contracts, did much today to give values an upward swing. Largely in consequence the close was unsettled, 1%c to 2%c net higher, with October \$1.54% to \$1.54%, and November \$1.52% to \$1.54%. Oats gained %c to %c to 1c. Provisions finished unchanged to 50c higher. Shorts in the corn market were plainly nervous over the scarcity of supplies in Chicago elevators and regard-

plainly nervous over the scarcity of supplies in Chicago elevators and regarding the meagre amount of pit offerings. The September option especially showed an over-sold condition and went to a sharper premium as compared with October.

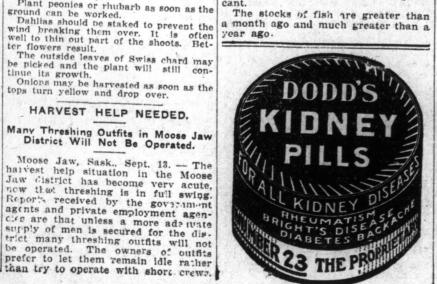

Widespread need of warm weather and sunshine counted to a material extent as an additional stimulus toward higher prices. Bears attempted to use the favorable war news as a factor in forcing a decline, but the buying was too persistent to allow success of the effort. Instead the market, even to the last retained mest of the day's advance.

Liberal purchasing on government account had a buillish influence in the oats market. Besides country offerings to total stocks of pork are about the same as last month, but a larger proportion of it is completely cured and available for immediate shipment. Spray lilac bushes with potassium sul-hide—one ounce to two gallons of water—to remove midew.

The stocks of beef have increased.
This fact agrees with other evidence that no new high records of prices Keep the sweet peas sprayed and we'l should occur in the near future. Evidently the stocks of mutten and lamb on hand a month ago have been seduce the view of the real for consumption as we suggested. that no new high records of prices Evidently the stocks of mutten and

Blame the Nerves

When you cannot sleep and are easily irritated and worried you have reason to suspect that the nerves are below normal.

They are not getting proper nourishment from the food you eat and need a little special help. A few weeks' treatment with Dr. Chase's Nerve Food will do wonders for anyone in this condition. Note your in-crease in weight while using this food cure.

There ar why the bonds they are as foll (1) Tax-free Lard-Pure, wood pails, 20 lbs., net, 320 to 33c.
The butter market is strong, with an advance in wholesale jobbing prices of ic per pound, but no change was made in the wholesale quotations. There is nothing new in the cheese Weeds use up moisture. When they grow in a crop they compete with the crop for the moisture, and weeds usually keep on growing after the crop is cut, thus using moisture that should be saved up for next year's crop.
