Indebted to Order.

In the early days of the order some members had been given policies for \$2,000 on assessments of \$1 a month. They had received insurance protection for twenty or thirty years really below cost. In some cases it might be they actually were indebted to the order for carrying these risks for hem.

The paid-up pelicy options were absurd, it was explained. According to that scheme, the order had given the members protection for a number of years absolutely for nothing. Prof. Mackenzie asserted that "the

order has been receiving assessments and paying death claims since 1879. Every dollar that has been paid into the beneficiary fund has been used to

the beneficiary fund has been used to pay death claims or is still there; not a dollar has been taken out of the fund for any other purpose." He says further that "the order is practically a new order without a dollar of deficit. and charging adequate rates so that no future deficit can occur." The bonds and debentures held by

the Grand Ledge of Ontario listed at par value amount to \$737,194.96, with cash in the bank, reserve fund ac-count, of \$6,660.78, making a total reserve fund cn July 1, 1916, of \$743,-855.74.

Since the notifications have been sent out, officers of the order have had a busy time explaining to incensed policy-holders that "they have no kick coming," that their dependents were protected at inordinately low rates: that they must, in fact, regard he protection in the light of fire in-urance; if they had died they would the protection and that was worth more than they paid for it.

THRESHING PROCEEDS IN SASKATCHEWAN

Sections.

REGINA, Sask., Aug. 30.--Threshing is well advanced in many parts of Saskatchewan and at two or three points the first sample of the new wheat has been deposited in local elevators, according to reports received by the Saskatchewan Co-Operative Elevator Co., here today.

Cutting has been completed in many places, and the reports, as a whole, are more optimistic than those received for the past few weeks.

At Archive, the Co-Operative Eleva-Co. was taking new wheat yesterday for the first time this season. From Avonlea it was reported that the wheat was all cut, several threshing machines having started work, and three loads of new wheat have already been hauled to the elevator.

I have given it to a number who wers terribly afflicted and even bedridden with Rheumatism, and it effected a cure in every case. I want every sufferer from any form of rheumatic trouble to try this acent; simply mail your name and ad-dress, and I will send it free to try.
