

IMPORTANT TO CURLERS!

KEITH'S NEW SHAPE

OF

CURLING STONES,

Imported and made expressly to suit Canadian ice, from his own model, introduced by him into the Toronto Club in 1869, and now being generally used.

We would caution persons from purchasing an imitation which has been imported lately. None are genuine but those sold by ourselves.

OUR NEW SHAPE OF HANDLES

Are also worthy of attention. They are much stronger and better balanced than those imported, and manufactured by ourselves at less cost.

Clubs and Private Rinks can have special quotations on application.

Also, special lots to suit purchasers when orders are given a season ahead.

D. S. KEITH & CO.,

Plumbers and Brass Founders,

109 King Street West, Toronto.

We, the undersigned, testify to the superiority of Mr. Keith's new shaped Curling Stones over any others, and to him being the inventor and introducer of them into the Toronto Curling Club.

We can strongly recommend them to all curlers, having the same in use ourselves.

(Signed,) **DUNCAN FORBES.**
