

DADS AND LADS MEET AT TABLE FOR BANQUET

Father and Son Get-Together at West Side Kirk

A very successful function was carried out in the school room of the West Side Kirk last evening in the form of a father and son banquet. The success was largely due to the efficient organization built up by the committee in charge and especially the executive of that committee composed of Leonard M. Wilson, superintendent of the Sunday school, the minister, Rev. W. McE. Matthews, Clinton D'Arcy, and A. W. Morrow. The men of the congregation responded heartily to the efforts of the committee and when the hour for the banquet arrived 127 "Dads" and "Lads" sat down to a banquet served by the Ladies' Club of the church in the efficient and appetizing style for which the ladies of the Kirk are noted.

TOASTS HONORED

The boys as well as the men who proposed or responded to toasts performed their part with great credit to themselves. The gathering was enlivened by a sing-song and by some special numbers contributed by a killed gentleman, A. Clinton Regan, who performed on the bagpipes and gave humorous Scottish songs. A special

Architects! Builders! Women want oven heat regulators on their gas ranges

MRS. PROSPECT has discovered that an oven heat regulator on the gas range means more freedom from the kitchen, saves weary hours of "watching," keeping the cooking running smoothly.

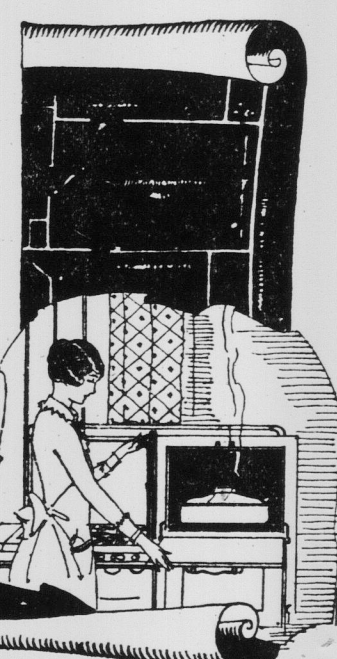

She has been counting on having one in that new house or apartment, so that she, too, can put her meal in the oven, regulate the heat to the proper degree, and forget about the kitchen till time to set the table. She will cast a discerning eye on the stove you have installed or the space provided for the stove and measure it up to her modern standard of kitchen efficiency and convenience.

Draw gas range satisfaction right into the blue prints, and select a range that will appeal to every woman who gives the kitchen of your property her expert appraisal. She's the one to please, and she has her heart set on an oven heat regulator!

Consultation on gas piping and the selection and installation of all appliances gladly given without charge. Just call Main 2930.

"Well, now, I must admit they do look lovely—and I can see they can't help but stay clean and shining without tending."

"And do you only have to turn these handles to get whatever you want? Isn't that great? What a grand oven! Oh, I see, it is packed to hold the heat for hours with the current off. And that's the jigger that makes the Moffat the only oven with perfectly balanced baking heat. Now let me see a few of other people's meter bills. Well, I guess we are wasting money without one and saving plenty with one. What about wiring and installing? Free—what? And the terms? Yes, I'll take this one here."
