LILLOOET IS

FINEST HYDROGRAPHIC STEAMER ON PACIFIC

General Description of Vessel's Appearance, Machinery and Scientific Apparatus.

Musgrave, generally conceded to be the pounds. finest hydrographic steamer on the Pa-the Pacific coast at present fitted with cific coast, will steam from Esquimalt Thompson Brothers' patent "Axiom"

The officers of the Lillooet are as follows: In command, Capt. P. H. Musfith; chief engineer, T. W. Allan; second engineer, A. Borrowman. Hydrographic survey staff, under Capt. Musgraphic survey grave: First assistant, H. D. Parizeau; second assistant, L. P. Davies; third

reporter was shown over the Lillooet at the ballast tanks, of which there are five capable of holding, altogether. 120 amount of information regarding her construction, equipment and general vated to the required levels,

grapher W. J. Stewart, embodying ideas the port and starboard engines, respecthus formed by him after years of ex- tively, for the guidance of the engir ce at the head of his department, eers. and built by the B. C. Marine Railway | On her trials the Lillooet attained a Company at its Esquimalt shipyard, speed of slightly over 12 knots, but, the Lillooet is undoubtedly one of the when new propellors, now being definest vessels of her class ever con-structed. On all concerned with her which were largely experimental, are construction she reflects credit and to fitted, she is expected to easily attain Capt. Musgrave must be given great 13 knots. praise for his part in superintending her equipment with the most modern hydrographic survey instruments in ex-

some steamer, her hull being built on and have a well-appointed dining-room, excellent lines and her spar-deck, bridge and pilot house being well-proportioned to her length and beam. She has an oveal smoke-stack and two masts, painted yellow having just suf-

above the water-line of the steamer, with a slight overhang, the bridge runs across the forward end of the spar-deck, and is so constructed and equip-ped that sounding observations can be made from it while a clear space, almost the entire length of the deck, aland keep in close touch with operations

taken up by house-work, giving, how-ever, plenty of space between the house The galley is a and the bulwarks for the carrying out of hydrographic work. A water-tight a cellular double-bottom. Forward, descending the whole depth of the steamer, there is a heavy hulkband formal to the pantries of both dining saloons. For the convenience of the ship's officers on night watches a steam cabinet is provided in their cabinet cabinet is provided in their cabinet cabinet

water-tight compartments, any two of which may be pierced without serious for perishables at any temperature redanger to the vessel.

the spar-deck, is exceptionally large and is equipped with every requisite for the most minute hydrographic observation work. Behind the chart-room is a clear space allowing for open air observations, an awning protecting it from rain and sun. Between the chart-room and the pilot-house are the accommodations for the sailing master.

Best Steel Vessel.

The Lillooet is 163 feet long, at the water line, 27 feet beam and has a mean draught of 11 feet. She is the best steel vessel ever turned out in the west of Canada and will take her place as the finest vessel of her class on the whole Pacific coast, in fact, one of the finest in the world.

Chicago Police Investigating

Case Involving Hundreds

of Thousands.

The Lillooet is 163 feet long, at the way or Government street was in Victoria. No evidence had been produced to show that the cause-way or Government street was in Victoria. This, the magistrate held, it was necessary to prove.

Mr. Alkman's objections were entered after the prosecution had closed its case, the witnesses heard being Constables Carlow, Harper and Macdon-stables Carlow, Harper and Macdon-sta dations for the sailing master and the chief and second engineers. Hydrographic Equipment.

and apparatus with which the Lilloget who so thoroughly embodied the sughowever, will not be amiss.

In addition to these there is one 18-foot ship's boat and two whale-boats, both 27 feet long, each fitted with masts and salls, centre-board and removable gunard aft.

The only other survey wessel long, each fitted with water-tight lockers fore and aft.

The only other survey wessel long, each fitted with water-tight lockers fore and aft.

The only other survey wessel long, each fitted with masts and stopped it when the machine was opposite him.

Constable Harper swore to having that pour into the coffers of the syndicate is said to prevent any plague-infected rats from coming off the boats.

The only other survey wessel long, each fitted with masts and stopped it when the machine was opposite him.

Constable Harper swore to having been on duty on May 27th with Constable Carlow timing automobiles pass-aid to prevent any plague-infected rats from coming off the boats.

The only other survey wessel long, each fitted with masts and stable Carlow timing automobiles pass-aid to prevent any plague-infected rats from coming off the watch of mercy and collecting contributions that pour into the coffers of the syndicate is said to have operated in various parts of the United States for the past six years.

note that the only other vessel on this hydrographic survey work while department officials, which is equipped ent purpose and "adapted," al with a similar steam-gear on the Lucas many other sloops of her class, to the machine is the C. G. S. La Canadienne, work. Liept. Miles, engaged on the Dominion government's St. Lawrence survey.

For the small boats there are also Lucas sounding machines of the most date type, hand-worked, and capable of sounding to a depth of 200

On the port side of the steamer a long boom projects immediately under the bridge which carries, when in operation, a long rod or cable. On the latter there is an attachment known as a "traveller," through which is operated a natent sounding apparatus which can sounding while the vessel is travelling at a speed of beeity of this gear is from 40 to 50 fath-
