

Local and General News.

THANKSGIVING—This is thanksgiving day.

REPAIRS OF THE Douglass Bridge are being effected under Supervisor Elliott.

THE TWO DISTRICTS, by Willis Collins, in the Lakeside Series, at the Miramichi Bookstore.

A FANCY sale to be held on Tuesday 21st by the Ladies of the Church of England, Chatham.

THE BROWN CASE—A St. John Grand Jury has found a true bill against Chas. H. Wright for bigamy.

THE BOYS—It will be seen by advt. that tenders for the usual moving of the Miramichi Boats are asked.

NEW SCHOOL HOUSE—The new school house in District No. 8 is to be opened on Monday 6th inst. Miss Tweedie in charge.

DENTISTRY—Dr. M. C. Clark, Dentist, is now prepared to render professional services to patrons at his rooms, Noonan's building, Chatham.

SHIP NEWS—The absence of our Chatham Shipping news this week is due to the fact that yesterday was the festival of All Saints—a Dominion holiday—and the Custom House was closed.

"BACKED DOWN"—A late number of the "Fredericton Reporter" informs us that its "Fighting Editor" has "backed down" in the matter of the proposed title match with the Editor of the ADVANCE.

SERVICE CLUB—A meeting was held by a thoroughly competent teacher, will be in Chatham, Newcastle and Dalry, during the ensuing winter. Full particulars respecting which will be advertised.

INTERPRETATION—We are requested to say that the gentleman interested in having a public meeting on the 10th inst. for incorporating Chatham has decided to postpone it for one week—to Tuesday, 14th inst.

THE BARQUE "MARGUERITE DE BRIT" arrived here yesterday from Cardiff. She was bound for Quebec, but being 74 days out got short of water and, owing to the lateness of the season, will probably load here.

FOUND DEAD—The keeper of Miscoe Light house, named McConnel, was found dead on the roof near the light last evening. When last seen alive, some two hours previous, he appeared to be in good health.

A DRUNKEN FELLOW held forth between the Canada House and Telegraph office yesterday, shouting and gathering a large crowd. After half an hour's very disorderly conduct a friend took him away in a wagon.

LOST DECKBOARD—The large Mary Jones which left here on the 6th inst. arrived at Liverpool on the 6th Oct. and, after being on board for 24 hours, was washed overboard and part thrown overboard to lighten the vessel, she having been on her beam ends.

SUIT UP—The enterprising proprietor of an open air skating rink had his operations suddenly interrupted on Thursday night last. He had pitched his tent in front of Letson's wheel scales, and was holding forth, when one of the justices directed a constable to put a stop to the proceedings, which was immediately done.

ST. JOHN'S, is informed that the real estate agents have decided to report company their communications; otherwise their letters go into the waste basket. We may remark, however, that the cause of the "stagnation" of the "stagnation" was the same that led him to believe, the other night, that the front door had seven keys.

ROAD SPREADING—The effect of digging and spreading sand and dry mud from roadsides and ditches in summer and placing it on the roads in the name of repairs, is fully realized at this season of the year. Many parts of the country are suffering from inefficiency or something worse on the part of those having charge of its roads.

WRECK—R. B. Call, Esq., Captain of the schooner "The Fish Hawk," reported a bark loaded with Extrait of Hemlock Bark put in there in distress. He reported ordered to be sold. This is no doubt the bark "Morgana," hence for London, G. B., loaded by Messrs. J. & J. Miller & Co., of Derby,—Advocate.

P. E. L. POLITICS—The writ for a new election in the county of Queen's, P. E. I., to fill the vacancy in the House of Commons caused by the appointment of Hon. Mr. Laird to the Lieutenant Governor of the North-West Territory, has been despatched to Sheriff Watson of Queen's county. The nomination will take place on the 15th November, and polling on the 22nd. Hon. J. C. Pope and Mr. Wm. Walsh are the probable candidates.

THE SUPREMACY COURT of the State of New York has decided that J. C. Ayer & Co., of Lowell, have the sole right to use the name "CHERRY PECTORAL" for a medicine, and has issued an injunction against F. V. Robinson, of New York City, for selling "Robinson's Cherry Pectoral" or "Cherry Pectoral Lozenges," or any other use of the name to deceive the public. This decision of the high court includes all dealers who sell any similar article.—Port-Jefferson (L. I.) Leader.

A GAY FOLK NEWCASTLE—Shelley is about to lose one of its most enterprising citizens by the removal of Mr. Hamilton, of the firm of Seash and Hamilton, to Newcastle, Miramichi, where he goes into the lumber business in connection with Mr. Fish of that place. They are building a very fine mill in the shipyard formerly used by the Hon. P. Mitchell and expect to have it ready for work early next season. Newcastle will gain a valuable citizen by this change and we trust that Mr. Hamilton will find his new location pleasant and his venture profitable.—Moncton Times.

A TRIP OVER "THE INTERCOLONIAL" is the title of a pamphlet received last week from the author. It is a reprint of a story written by Mr. Fred J. Hamilton and published in the Montreal Gazette during and after a trip made by that gentleman over the Intercolonial Railway. It contains a good deal of information which though not as accurate as it ought to be in many respects is calculated to be of considerable advantage to travellers and tourists passing over the Intercolonial. Mr. Hamilton's style is not so bad as that of the guide book man, while it is not so good as that of the journalist; still he has succeeded in putting the information he got into readable shape, and we hope his little work will find a ready sale.

A GOOD SORT OF FELLOW can be easily spoiled by being struck with political lunacy. In his sane moments our friend, Stevens, of the Times can write clever and good-natured things. Here is a sample:—

A New York divorce lawyer, named Home, was shot some time ago by his wife, and the Courts have found that she was justified in what she did. We are not personally acquainted with the wife, but if this should meet her eye, we hope

when four streams were turned on the

valuable service she has rendered to us and mankind in general by her well considered action. During several years past this House used to bother us a great deal by sending his card for publication every few weeks, and although we never took any trouble with the creature, beyond trying his medicine in the waste basket, yet we cannot conceal a certain pleasure in the thought that he is now gone where the millionaires and the million go. We are, therefore, very glad to see this notice. Thank you, Mrs. Home.

Judging the thankful man by some of his other writings we have an idea that Home never sent him an "ad," but the manner in which the matter is published is none the less attractive for all that.

A STRANGE ANIMAL IN THE WOODS.—One day last week, while Mr. Samuel Joy was roaming through the woods, near Bolton lake, in quest of timber, a strange and ferocious looking animal, which he describes as fully seven feet in length, standing somewhat higher than a large Newfoundland dog, and of a light, grayish color, came out of the undergrowth a few rods ahead of him. Mr. Joy, having his fowling piece in his hand, let it fly at the monster in the shoulder, but his gun was only loaded for flying partridges, the shot had no other apparent effect than to make it bound off through the forest. Mr. Joy has been lumbering over thirty years, and until last week thought he knew all the wild beasts that infest the woods of New Brunswick.—St. Stephen Journal.

DR. ARNOLD, of Berlin, Prussia, evidently ranks high as a Physician and Surgeon in his native country, as proved, by the Diplomas and Credentials in his possession, and many who have been his pupils in St. John, Moncton, Miramichi, and other parts of the Province, have found him skillful and able to fulfill his promises. Those who suffer from defective sight or hearing, or any chronic complaint will profit by consulting the Doctor as early as possible. He has been practicing his profession here since 14th July and has received such encouragement as to determine him upon remaining until the latter part of November. He can be consulted free of charge at his office at Mr. B. Stapleton's, Duke Street.—Advt.

THE DOCTOR is now at Bathurst, and will be at the North until 15th inst. At the end of that time he will return to Chatham.

FRISBERG CASE—The News contains the following in reference to an important case:—The Sheriff, after having returned a panel of twelve jurors for the trial of civil cases under the County Courts Act, the above cases were ordered to stand over until the next meeting of the Court on January 18th.

IN the case of the Queen v. Samuel H. Stockton, by instructions from the Attorney General a *nolle prosequi* was entered on the indictment. The defendant, who was in attendance at court awaiting trial was discharged from his recognisance.

THE Grand Jury having found a true bill against Matthew Hanley for assaulting Elwin Hartford of Duello's Circus, Hanley was arraigned and pleaded guilty. The jury rendered a verdict of guilty on the second count, to wit: for assault, causing actual bodily harm, and recommended the prisoner to the mercy of the Court. Hanley was sentenced to six months imprisonment in the County goal—a mild sentence considering the serious nature of the offence. The Court adjourned on Thursday evening.

THE Examination of the Schools in No. 1 district, Chatham, took place this week. The primary department taught by Miss Alexander was examined on Monday. The gentlemen of the Trustee board, and a large number of visitors were present. The exercises were in Reading, Spelling, Work-building, Arithmetic, Drawing, Definitions of Mathematical terms, Singing and physical exercises. Recitations were delivered by Misses Fanny Gillespie, Laura Haviland, Clara McNeil, Clara Benson, Beattie Colgate, Beattie Carter, and Masters Adam Shiroff, Gordon Gray, and Theo. Kingston. Since this department has been under Miss Alexander's management the examinations exhibit a state of proficiency in the pupils creditable to the teacher and satisfactory to parents and friends. The average attendance is forty, daily.

THE Intermediate department, taught by Miss Minnie Haviland, was examined on Tuesday, in presence of the board of Trustees—Messrs. McCulley, Murray, and McCurdy—and a number of visitors. The pupils, twenty-six in number, were examined in Reading, Spelling, Oral Geography, State and Mental Arithmetic and Composition, and displayed a proficiency in the several exercises as to elicit much praise from the trustees and visitors. A dialogue was given by Misses Irene Strang, Annie Haviland and Annie Brown; and recitations by Master Miles McKay, and Miss A. M. Murray and Miss Benson. The pupils of this department also joined in the singing exercises of the Advanced Department.

THE Advanced Department taught by Miss Williston was also examined on Tuesday. The Trustees, Rev. Mr. Forsyth, Rev. Mr. Allan, Rev. Mr. Fogg, and Rev. Mr. Smith and quite a large number of the parents and friends of the pupils were present. Nearly fifty pupils were in attendance, embracing 2 classes. These were divided into Senior and Junior Reading, Senior and Junior Grammar, Junior Geography, Mental Arithmetic, etc. The exercises in Mental Arithmetic showed great proficiency and the pupils acquitted themselves very creditably in the other branches. The Junior Reading class had a Scotch "table" selection given by it by Rev. Mr. Allan and did not do well with it, but the test was not a fair one and when another piece was selected the class did much better. A number of the children gave recitations. "The Face against the pane," by Miss Henrietta Landon, and "Jessie Brown of Lucknow" by Master Ernest Murray, were received with applause. "My Lifeboat" by Willie Snowball, Clifford Wyse, Stanley Murray, Ernest Blair and Willie Carter, was also given with much spirit and good effect. The school also sang "The Fisher Boy" and two pieces, in which the pupils of Miss Haviland's department joined.

ON Tuesday next a Reading competition is to take place and a prize is to be given to the best reader in the school.

THE examination of the pupils or the High School was also held on Tuesday afternoon, the Trustees and visitors named above being in attendance. The time allowed for this examination was so short that there was a number of studies in which the pupils were not examined. The exercises were in Reading, Grammar, History, Latin, and Mathematics. In the first class in Reading, Miss Brown received 1st prize and Master Alex. Templeton, 2nd; in the second class in the same, Miss Beattie Carmichael took 1st prize, and Master Charles Kelly, 2nd.

AT the conclusion of the examination Mr. McCulley announced the closing of the department until the 6th inst., when it would be reopened under the management of Mr. J. B. Oaks.

Correspondence.

WE invite correspondence on all local subjects, and especially on those of general interest to our readers. We are not responsible for the opinions or statements of our correspondents, but we are glad to see them. We are not responsible for the opinions or statements of our correspondents, but we are glad to see them.

A SAD ACCIDENT.—A BRIDGE WITH A "TAIL" was a sad accident that befell Station Master Payne last week. He went out in a hurry to signal trains which were approaching, when, somehow, the lever that works the semaphore slipped and struck him on the head fracturing the skull, I believe. He lies in a very precarious condition. Much sorrow is felt, for him as he was universally esteemed. He was most attentive to his duties, and, at the same time, singularly obliging to all with whom he came in contact, either officially or otherwise. Some think that the remote cause of the accident was overwork. If the hands of the railway exact too much of the body, it is, indirectly, its own fearful responsibility to assume. Station Masters must have sleep as well as other men. Since the late change of trains the accommodation passes north here at 8 in the evening, then during the day he must be the express passes in the same direction, and a little after three the express goes south. It is not intended by this arrangement that the station master should be constantly on hand to deliver freight, to attend to special orders and other duties.

THE BRIDGE that connects the town and village of Bathurst is well known to travellers in the north. There hangs a tale, I mean, to be told to the children of the town. It is a tale in fact, on one side of it, contrary to the rule which governs casual apocryphes. Some time last winter it was decided to build a foot-path for the safety of those who walk. It is said that it is not very safe to be caught between vehicles going in different directions, and your correspondent is able to comprehend the necessity. Well, the work was begun and carried on slowly until near the time of the ice going out, when all at once the work was stopped. It was found that the lumber on hand was done and the delay was said to be necessary till planks could be brought from Carquet mill. For the unscientific it may here be added that Mr. Burns, N. B., is the owner of the Carquet mill, which is situated in the Carquet mill, and that he is 40 miles by land from here and perhaps 60 by water. There is rather an extensive saw mill in Bathurst Villages, there has been for some years past, and it is situated in the Carquet mill in town. But then if the Carquet mill can undersell these others even after transporting the lumber all that distance, why no more is to be said. Strangely so, however, more work was being done on the second or third day of the winter, or the time of the ice, and the ice will soon be with us again. Whether the lumber has arrived yet your correspondent cannot say. All seems to be ready for the planks of the flooring. Yours, &c., A. ALLEN.

A TUMBLER'S RAILWAY CRASH.—On Friday morning last a freight train on the New Jersey Midland Railway was wrecked in the vicinity of the Carquet mill. The train was loaded with lumber and other goods. The cause of the accident was the failure of the bridge crossing over the Erie Railway line of the former cars jumped the track, and striking the end of the bridge pushed it off the abutment, when it fell into the water. The train which an Erie passenger train had just passed. The Midland engine was upset, and ten or twelve freight cars, and box cars were pitched into the chasm. The engine and its train were crushed to bits, and the train was a total wreck. The conductor was so badly crushed that he was not expected to live. A brakeman had both legs amputated, necessitating amputation. Another brakeman jumped from the train just in time to save himself. The loss to the Midland Railway Company was from \$20,000 to \$30,000.

THE National Bank of Montreal, which has a capital of \$1,000,000, was examined on Tuesday, in presence of the board of Trustees—Messrs. McCulley, Murray, and McCurdy—and a number of visitors. The pupils, twenty-six in number, were examined in Reading, Spelling, Oral Geography, State and Mental Arithmetic and Composition, and displayed a proficiency in the several exercises as to elicit much praise from the trustees and visitors. A dialogue was given by Misses Irene Strang, Annie Haviland and Annie Brown; and recitations by Master Miles McKay, and Miss A. M. Murray and Miss Benson. The pupils of this department also joined in the singing exercises of the Advanced Department.

THE Advanced Department taught by Miss Williston was also examined on Tuesday. The Trustees, Rev. Mr. Forsyth, Rev. Mr. Allan, Rev. Mr. Fogg, and Rev. Mr. Smith and quite a large number of the parents and friends of the pupils were present. Nearly fifty pupils were in attendance, embracing 2 classes. These were divided into Senior and Junior Reading, Senior and Junior Grammar, Junior Geography, Mental Arithmetic, etc. The exercises in Mental Arithmetic showed great proficiency and the pupils acquitted themselves very creditably in the other branches. The Junior Reading class had a Scotch "table" selection given by it by Rev. Mr. Allan and did not do well with it, but the test was not a fair one and when another piece was selected the class did much better. A number of the children gave recitations. "The Face against the pane," by Miss Henrietta Landon, and "Jessie Brown of Lucknow" by Master Ernest Murray, were received with applause. "My Lifeboat" by Willie Snowball, Clifford Wyse, Stanley Murray, Ernest Blair and Willie Carter, was also given with much spirit and good effect. The school also sang "The Fisher Boy" and two pieces, in which the pupils of Miss Haviland's department joined.

ON Tuesday next a Reading competition is to take place and a prize is to be given to the best reader in the school.

THE examination of the pupils or the High School was also held on Tuesday afternoon, the Trustees and visitors named above being in attendance. The time allowed for this examination was so short that there was a number of studies in which the pupils were not examined. The exercises were in Reading, Grammar, History, Latin, and Mathematics. In the first class in Reading, Miss Brown received 1st prize and Master Alex. Templeton, 2nd; in the second class in the same, Miss Beattie Carmichael took 1st prize, and Master Charles Kelly, 2nd.

AT the conclusion of the examination Mr. McCulley announced the closing of the department until the 6th inst., when it would be reopened under the management of Mr. J. B. Oaks.

WANTED.

WE want reliable, energetic canvassers for the new "Illustrated History of the Dominion of Canada." This work is truly magnificent, containing over 2,000 double column quarto pages, and over 300 superb full page engravings. The work is published on facts, on a plan which ensures its welcome to every English reading family. To energetic young men or ladies, we are offering to work, we will guarantee a permanent position for two years, and good pay! Do not fail to write for our private terms, sample pages, etc. This is a grand opportunity for school teachers to make more than double their salaries without interfering with their professional duties. The work is being manufactured at a cost of over \$20,000 for this literary, artistic and mechanical work of producing the plates, by the old-established, reputable Lowell Printing and Publishing Co., of Montreal. All letters from agents must be addressed to the Publishers general agents as follows:—

HAZEN B. DIGNY & CO., 23 and 30 St. Francis Xavier Street, MONTREAL, QUE.

THOMAS' ELECTRIC OIL! WORTH TEN TIMES ITS WEIGHT IN GOLD. DO YOU KNOW ANYTHING OF IT? IF NOT, IT IS WORTH YOUR ATTENTION.

There are but few preparations of medicine so efficacious as this. It is a true and judicious preparation of the best oils that are known, each possessing virtues of its own. Scientific physicians know that medicine is formed of several ingredients in certain fixed proportions of great power, and produce effects which would never result from the use of any one of them, or in different combinations. Thus in the preparation of this Oil, chemical change takes place, forming a compound which could not by any possibility be made from the other constituents or proportions of the same ingredients, or any other ingredients, and differing from anything ever before made, one which produces the most astonishing results, and having a wide range of application than any medicine ever before discovered. It contains no alcohol or other volatile liquids, consequently does nothing by evaporation. It is not only safe for the most delicate, but it is also safe for the most robust. It is a true and judicious preparation of the best oils that are known, each possessing virtues of its own. It contains no alcohol or other volatile liquids, consequently does nothing by evaporation. It is not only safe for the most delicate, but it is also safe for the most robust. It is a true and judicious preparation of the best oils that are known, each possessing virtues of its own. Scientific physicians know that medicine is formed of several ingredients in certain fixed proportions of great power, and produce effects which would never result from the use of any one of them, or in different combinations. Thus in the preparation of this Oil, chemical change takes place, forming a compound which could not by any possibility be made from the other constituents or proportions of the same ingredients, or any other ingredients, and differing from anything ever before made, one which produces the most astonishing results, and having a wide range of application than any medicine ever before discovered. It contains no alcohol or other volatile liquids, consequently does nothing by evaporation. It is not only safe for the most delicate, but it is also safe for the most robust.
