WHAT DO YOU DO WITH YOUR STALE BREAD? Bread is one of the items most commonly wasted in many households. This waste is probably due to the fact that many housekeepers do not think of bread as costing much and are careless about its use, or do not know what to do with the odds and ends frequently found in the bread box.

The tam is very much in evidence even now. The time has come for suits to be seriously considered. Buttons are to take an important part in suit trimmings and the "sensible" costume is to be the favored one.

Another good way of using stale bread or of treating bread so that it shall not become stale, is to put the pieces in the warming oven or on the back of the stove and leave them until they are crisp and a delicate brown throughout. This is often called twice-baked bread and is very popular with children and also with grown-ups who like its "crunchiness" and the flavor which comes with the slight browning. The rusks which used to be commonly served, like breakfast cereals, in some parts of the country were made by crushing such twice-baked bread with a rolling pin.
