

	PAGE.		PAGE.
Business experience, value of, to engineer	783	Civil engineering course, of what composed	96
Business, integrity in	830	Civil engineering, definition of	957, 958
Business knowledge, value of, to engineer	522	Civil engineering, dependence upon scientists	956
Business methods, importance of teaching	862	Civil engineering, divisions of	100
Business methods, the study of	513, 851	Civil engineering education	85
Business principles, teaching of	944	Civil engineering education in Japan	141
		Civil engineering education, reason for preparation of paper on	87
C		Civil engineering, features of	821
Cable attachments, for lift-bridge	532	Civil engineering, ideal course in	87, 104, 105, 106, 145
Cables for Halsted Street Lift-Bridge, adjustment of	541, 548, 568	Civil engineering, its value	971
Calculating, simple methods of	482	Civil engineering profession, origin of	189
Calculation of power to move Halsted Street Lift-Bridge	555	Civil engineering, standing among professions	810
Calculations, advisable extent of accuracy in	447	Civil engineering, studies bearing upon the profession	950
Calculations, economical methods of	447	Civil engineering, the constituents of the profession	955
Calculations for Halsted Street Lift-Bridge buffers	553	Civil engineering, time schedule of course in	107, 108
Calculations, methods of preservation of	858	Civil engineering, view of field of	810
Camp, moving of, in surveys	37	Classes, size of	135, 140
Camp, notices of change	37	Classification of materials in excavation	44
Canadian Pacific Railway, Dr. Waddell's work on	2	Clear roadway, width of	437, 451
Cantilever girders for elevated railroads	617	Clearing for railway	18, 40
Caps for pedestals	670	Close cutting	44
Career, planning of engineer's	796	Coal mine, Dr. Waddell's work in	2
Carnegie Institution of Washington, purpose of	931	Coffer dam for flow-line bridge	919
Catalogue libraries	81	Collision of vessel with Halsted Street Lift-Bridge	576, 580
Catalogues, their value in schools	178	Collision strut	339
Catch-water drains	21	Column feet, design of	605
Cement, improvements in	778	Column feet for elevated railroads, protection of	638, 665, 738
Cement, Portland, best and cheapest	599	Column feet, need for	744
Cement, specifications for	507, 658, 660, 676, 717, 896	Column formulae	284, 285, 296, 297, 302, 307, 322, 324, 344, 355, 360, 366, 307, 373, 383, 397
Cement, testing of	163	Column sections for elevated railroads	605, 691, 732, 750
Centrifugal force, transferred load from	451	Columns, bending in, on elevated railroads	745
Changes in appliances	877	Columns, fixing ends of	291
Cheap drains, ultimate cost of	24	Columns for elevated railroads, diaphragms in	634
Checks in surveying	36, 37	Columns for elevated railroads, omission of webs in	747
Checks, value of	515, 824	Columns for elevated railroads, proportioning of	642, 644, 670, 738, 747
Chemistry in technical courses	168	Columns for Halsted Street Lift-Bridge	550
Chemistry, relations to engineering	961	Columns, styles of	642
Chicago River, Halsted Street crossing of	520	Columns, subject to bending, webs in	738
Chords, curved	277	Columns, web plates for	642
Chords, formulae for proportioning	440	Columns Z bar, difficulty of manufacture	684
Chords of lattice girders, local bending in	730	Combined stresses	356, 373, 388, 442
Civil engineer, breadth of	105		
Civil engineering and scientists, relations between	955		
Civil engineering, constituents of courses in	121, 130, 133		
Civil engineering course, future	171, 172
