

The consistent use of the scales and Babcock test to get accurate knowledge of the production of each cow, and then a wise use of this knowledge to weed out the poorer animals and to use better feeding methods, will surely pay real money by the increased production of the herd.

TABLE No. V.

AVERAGE PRODUCTION OF COWS RECORDED FOR THE FULL PERIOD OF LACTATION IN EACH TESTING CENTRE IN BRITISH COLUMBIA.

District.	Testing Centre.	Number of Herds.	Number of Cows.	Average Production		
				Milk.	Test.	Fat.
				Lb.		Lb.
Kootenay.....	Nakusp.....	4	11	7,485	3.0	297.8
Kootenay.....	Salmon Arm.....	3	23	6,004	4.0	251.3
Yale-Caribou.....	Kelowna.....	2	6	5,073	3.0	261.4
Nanaimo.....	Ganges.....	3	14	5,001	4.4	254.6
