

HAD TRIED MANY REMEDIES FOR CONSTIPATION

FOUND NONE TO EQUAL
Milburn's Laxa-Liver Pills

Constipation is one of the most prevalent troubles the human race is subject to, and is the greatest cause of many of our ailments. **Keep the Bowels open and you will very seldom be sick.**

Mrs. M. Bell, 467 Harris St., Vancouver, B.C., writes:—"I had tried many remedies for Constipation and never found any so satisfactory as your Milburn's Laxa-Liver Pills."

We always keep them in the house and would not be without them.

"I recommended them to a neighbor and she is highly enthusiastic about them, as her's is a very difficult case, and she expected no good results from them. You may imagine her surprise and gratification when she found that they completely cured her."

Milburn's Laxa-Liver Pills are 25c per vial, or 5 vials for \$1.00, at all dealers, or will be mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

BRAMPTON Jerseys

CANADA'S GREATEST JERSEY HERD
We are offering for sale one 2-year-old bull and four yearlings, fit for service; also six bull calves; females of all ages. Come and see them or write.
B. H. BULL & SON, BRAMPTON, ONT.

WANTED!

Ten Jersey Heifer Calves, from 2 to 4 months old, eligible to register. Send description, with lowest cash price, to: **High Grove Stock Farm, P. O. Box 111, Tweed Ont.**

Recently one of our most fastidious young men bought a pair of overalls, and found in them the name of the sewing girl who made them. He very promptly wrote her a letter with all the effusiveness necessary in such a case, and in due time received a reply, which, however, was void of the romance usual in such cases. Here it is: "I am a working girl, it is true, but I make a good living, and do not care to support a husband, as I would do if I married some silly noodle who gets mashed on a girl he never saw. Permit me to say that I do not know how my card got in that pair of overalls, and that when I do marry, if ever, it will be some fellow who can afford something better than a 47-cent pair of breeches."

ARE KNOWN AS THE FARMER'S FRIEND

**Dodd's Kidney Pills Doing
Great Work in the
Prairies.**

**Michael Anderson joins the throng who
are shouting their praises—They
cured his Gravel and Rheumatism.**

Pine Valley, Man., Oct. 17.—(Special).—Michael Anderson, a well-known farmer living near here, is added to the number of those who have sent the cry echoing over the Prairies, "Dodd's Kidney Pills are the farmer's friend." And truly, Mr. Anderson has reason to praise the great Canadian Kidney remedy. Listen to his experience:

"A strain and a bad cold started my troubles," says Mr. Anderson, "and for twelve long years I was a victim of Kidney trouble, Rheumatism and Gravel. Doctors attended me, and I tried many medicines, but they did not cure me. Dodd's Kidney Pills cured me in less than one month."

It is easy to do anything when you know how. Mr. Anderson went right to the root of his trouble. He cured his kidneys by using Dodd's Kidney Pills, and, with the root gone, the other diseases disappeared. Dodd's Kidney Pills always make healthy kidneys, and with healthy kidneys, you can't have Rheumatism or Gravel.

QUESTIONS AND ANSWERS. Miscellaneous.

BUCKWHEAT FOR PIGS.

Will you please inform me as to the feeding value of buckwheat for fattening pigs. Also, would it be better fed alone, or with other grain? A. W.

Ans.—Buckwheat is fairly valuable for pig-feeding. It is considerably lower in digestible nutrients than barley, rye, wheat or corn, and would probably not rank higher than about two-thirds the value of barley or corn. Its woody hull makes crushing rather a necessity before its greatest value can be obtained by swine. Better results would be obtained by feeding with skim-milk, or by adding one part wheat shorts to two parts buckwheat.

SALTING HAY.

What value has salt upon hay that may be put in mow green or wet? I am told, if mowed wet, salt will prevent mould. F. L.

Ans.—It is difficult to say what is the extent of influence which salting has upon stored hay. Where hay is put up somewhat immature, or, on account of showery weather, more or less damp, salt undoubtedly has a marked preservative influence. When cattle do not receive enough salt, in other ways, this salted hay is greatly appreciated, but when they have plenty of salt, then the salting of hay does not increase its palatability. Some think salting decreases the digestibility to an extent. When hay is well cured before storing, salting is not necessary, and probably not advisable, but with hay stored when damp or immature, salting is safe practice.

INTEREST ON TAXES—SCHOOL RATES.

At a recent meeting of council, a by-law was passed, stating taxes paid before Nov. 1st, 5 per cent. discount would be allowed; and on taxes paid after Dec. 14th, 5 per cent. interest would be charged.

1. Is the council justified in charging the 5 per cent. interest?
2. If so, would the 5 per cent. allow the taxpayer till Nov. 1st, 1911, to pay the taxes?
3. Can they charge school taxes on a farm two miles from the school, farm being a mile from a road, only being approached by a trail for the other mile, which is practically impassable spring and fall?

TAXPAYER.

Ontario.

Ans.—1. Yes.

2. No.

3. We think so.

SILO—SWEET CORN.

1. What size silo would you recommend for feeding 10 cows?
2. Please state quantity of material required to build silo recommended?
3. Would sweet corn make first-class silage?

E. A. W.

Ans.—1. A silo 12 feet in diameter and 25 feet high will hold about 58 tons of silage, which is more than 10 cows will eat in six months, giving them 50 pounds each per day. However, we would recommend the structure of a silo somewhat larger than one's immediate needs demand, and would, therefore, suggest the building of a 12 to 15 foot silo, 25 feet high, or a 16-foot silo, 22 or 23 feet high. If one has more silage than is required for winter feeding, it may serve a good purpose in a dry summer, if pastures fail, as the silage will keep for years. With greater height and less diameter there will be less waste of silage by spoiling on the surface in warm weather, or when a small number of animals are kept.

2. You do not specify the kind of material you wish to use. We would recommend the round cement silo, with a solid wall. A 12 foot silo 25 feet high, with a wall eight inches thick at the bottom and four inches thick at the top would require, approximately, 20 barrels of cement, four loads sand, 500 ft. gravel or crushed stone, and the cost will approximate \$120 when built.

3. Yes, though the excess sugar tends to develop too much acid in fermentation, but is not enough so make a serious difference in the silage, other things being right.

Steel Shoe Wearers

Are Saving BARRELS of MONEY!
GRAND OFFER

We offer to send you a pair of Steel Shoes for **FREE EXAMINATION**, on deposit of the price, and let the shoes themselves tell you their story of comfort, lightness, neatness, strength and wonderful economy. They will tell you more in five minutes than we could on a page of this paper. If they don't convince you instantly, don't keep them! Notify us to send for them at our expense and every penny of your money will be returned without delay or argument.

World's Grandest Work Shoes

These shoes are our own invention. The soles and an inch above, all around, are pressed out of one piece of light, thin, springy, rust-resisting steel.

Corrugated Steel Soles!

The bottoms are corrugated, making them 100 per cent stronger than before, and are studded with adjustable Steel Rivets, that take the wear and give a firm foothold. When Rivets are partly worn, replace them with new ones, by hand, yourself, making shoes as good as new. 60 Extra Rivets cost 30 cents, and should keep shoes in repair for two years at least.

Stronger! Lighter! Better! Many Times More Durable

One pair outlasts 3 to 6 pairs best all-leather work shoes. They are stronger, lighter, better, more comfortable and economical than leather shoes. They absolutely do away with corns, callouses, bunions and swelling of the feet! Give splendid protection against coughs, colds, rheumatism, sciatica, etc., by keeping the feet bone-dry in spite of mud, slush or water. Uppers are of finest quality pliable waterproof leather, joined to the steel by non-rusting metal rivets, making water-tight seam.

SEND NOW! Don't put it off! Simply remit price and get a pair for **FREE EXAMINATION** at our risk. Be careful to give correct size of shoe. Then if you don't say at once that they are the grandest work shoes you ever put on your feet, your money will be refunded.

N. M. Ruthstein, Sec. and Treas. Steel Shoe Co., Dept. 456, Toronto, Can.
Main Factory—Racine, Wis., U.S.A. Great Britain Factory—Northampton, England.

FREE
