Fill the Water Pan

AND be sure the furnace heated air contains the natural amount of humidity—moist and refreshing—not the parching heat given off by the average furnace.

You'll enjoy more solid comfort and at the same time save coal, by installing a

"Good Cheer"

Circle Water Pan Furnace

The evaporation from this big waterpan, which entirely surrounds the firepot and holds from 4 to 6 gallons, is sufficient to keep the warm air supplied to each and every room almost as humid as the outdoor air. That means genuine comfort without heating the house above 68°—and in consequence a substantial saving in coal.

Even more important than the economy is the improvement in the health of your whole family. Breathing the humid, healthy air from the "Good Cheer" furnace, they will escape the colds, sore throats and lung troubles which are bound to follow the continued breathing of the dried out, over heated atmosphere produced by the average furnace with its make-shift little water pan.

Before you decide on your furnace write for descriptive literature which explains more fully the advantages of the "Good Cheer" furnace and its patented Circle Water Pan.

FIG. 182

This Cylinder Shows Why The "EUREKA" Root Cutter

is the best on the market.

See how it is designed. Grooved knives, with the grooves on one blade opposite the teeth on the next. Instead of slicing or pulping, the "Eureka" turns out roots in shreds—thin narrow strips—

suitable for any kind of feeding.

The "Eureka" shreds from one to two bushels a minute, and turns so easily that a child can operate it.

In the "Eureka" the feed is kept free from dirt, the feeder bottom being made with iron rods, thus allowing all dirt to drop out before it can reach the shredding cylinder.

The sloping form of the cylinder makes the machine a self-cleaner. Write for catalogue which explains fully.
