CLEAR

resolution

Doubtless,

In the good providence of God it is our privilege to assemble on the sixtyfifth annual session of this Right Worshipful Grand Lodge. Each year marks a mile post in our history and we come together today feeling that the history of the past year shall stand for success

We meet tonight in the historic city of St. John. Here a century or more ago our forefathers disembarked braving the uncertainties of an unknown land rather than turn against the flag of their country. Here they endured much, suffered much, lived fought life's battles and died as becomes true men and brave. We have received from them a heritage not to be despised. Their love for their country and their loyalty, which they showed by taking up their new life in a new country, has found its way to us through their children and we, rejoicing in the remembrance of lovalty and in the freedom of our Protestant religion, assemble tonight to do the business of our order in this historic city and trust that our work for libfreedom and influential brother hood shall commend itself to the intel ligent, well-thinking people of the pro-

I will not deal with statistical may ters, the grand secretary in his report shall take up that matter. I have visited the different parts of the province and performed propagation work as far as possible. Owing to the year past being a heavy year of work in the field of labor which is mine. I have not been able to go to some of the places that have sought my services but I have reached north east south touching Campbellton, Moneton, St. John, St. Stephen, with intermediate points, as well as parts of Victoria, Carleton and York counties Good results have followed the differ-ent meetings and a clearer conception

given to the people. Many things have impressed upon me the need of our order in this growing country. "The rudiments of an empire are plastic yet, and warm," and force that the principles we represent may not be overruled by the passion power, which is so evident in our land. Representatives of other nations the cosmopolitan character of whom is impressed upon us, are apt in their greed and lust and passion to overrule and obliterate those fundamenta teachings for which our fathers bled and died. Our order must stand and resist this incoming tide. We must hear the clarion call to service and become the leaven in the lump, that this new nation shall stand a defender of the faith and a home for those who

love liberty. That the need of the influence which this order disseminates is still evident from the fact that only a few days ago a Roman Catholic bishop in the prov nce of Quebec placed his episcopal rights as superior to that of a judge upon the bench, claiming that as a bishop he was not subject to the courts of the land. Shall the church rule the state? Shall the church dictate to the representatives of justice? Shall the power of Rome be superior to that of the crown of England? We trust not, but from such things it is burs to re-

tain deliverance. In travelling through our province one thing has impressed me and caused deep regret. In spite of the strength of our order and its vast influence I have found a surprising indifference to the claims of the Protestant religion. Not that the people are not good Protestants, but they are falling far short in the matter of breeding loyalty to the principles of the Protestant religion in their children. That our future is interpreted by the education given our children and the need of information, historical and religious, such as relates

the true principles of the Protestant

faith, is evident wherever we go. At the last annual meeting a committee was appointed to interview the vernment regarding the flying of Canadian ensigns at the different school louses of our province. The success hat attended that committee's efforts shall be told you in the report which they shall make. I do not intend to recast that report, but I would say this, now that the committee is able to report success, let the brethren from he different parts of the province see that a flag is provided and that it flies every school day of the year.

Another thing which has impressed me is the catering of the politicians to Roman Catholic influence. We can was compelled by alarming nervous and by November I felt more like myeasily understand this in view of the and mental symptoms to cease his pasct of the unity of the Roman Cath-church. In matters affecting its plied by Rev. Dr. Whittier until New tiny the adherents of that church Year's. Do You Admire a Perfect Woman?

Who doesn't envy and admire a perfect woman. After all, her perfection and charm have a commonplace origin, for the secret of her loveliness is health. To be beautiful a woman must eat well, digest well, sleep well. Harmony must be maintained throughout her delicate organism-intricate functions must be vigorous and regular. Physicians say that of all woman's remedies, Ferrozone is the best, it vitalizes those functions upon which life depends. Pure blood is the secret of all, and it is the purest and richest kind, and plenty of it that Ferrozone makes. Think of it, a beautiful complexion, pure and spotless as the lily-that's one effect of Ferrozone. Sallowness and headaches disappear-tiredness in the morning gives way to vigor and strength-the nerves are given endurance - angular hollow places gradually take on flesh and the symmetry of the body results. No woman or girl, however young or old, whether in sickness or health, can afford to miss the benefits of so good a remedy as Ferrozone. Sold in 50c. boxes, or six for \$2.50 at all dealers.
