THE HURON SIGNAL

Published every Friday Morning, by Mc GILLICUDDY BROS., at their Office, North of the Square.

TERMS.—\$1.50 in advance, postage prepaid by publishers; \$1.75, if paid before six months; \$2.00 if not so paid.

FRIDAY, MARCH 6TH, 1885.

The official count of the votes cast for the Act in the united counties of Northumberland and Durham was 2187.

Mr. Charlton is in favor of reducing the regular postage on letters to two cents.

If it be true, though we doubt it, that Lake Michigan if frozen over, the boys of to-day who ram over the vasty deep of our fresh waters will have a yarn to spin forty or fifty years hence that will surprise the coming generation.

At one time it was estimated that about one-half of the British army was Irish, but the proportion is not so large now.

Young Tupper a week ago in the House, alluded to workmen as the "lower orders."

The Goderich Signal boasts of the excellency of its own report of the late Sunday School Convention, and claims that it is better than that of any other paper; so it is, as it was stolen from the New Era and a little more added to it.

Brother Holmes is too fat. The report of the secretary was handed us by one of the secretaries, while at Senforth and the Senforth Era came out the same week as the New Era with the "minutes," which were common property.

The British Government announces that all the offers of fighting men made by the colonies will be accepted by the War Office, if circumstances provide that reinforcements to the regular army are needed.

The total receipts for the township of Stanley for 1884 were \$13,572.46, and the total payments \$13,292.79, leaving a balance of \$279.67.

NEW LEGISLATIVE BUILDINGS.

We are glad to see that the Provincial Government has decided to go on with the work of erecting new buildings for the legislature. The present parliament buildings at Toronto have served their day.

The cost of a new building, which also means new grounds, will be about \$1,000,000.

There is another reason why the Mowat Government should take up the matter now, and erect the buildings.

The Fenian scare is upon some of our fellow countrymen again. We don't know much about the intentions of the Fenians in the United States, who are panting for gore—British gore—but if they come across the border with hostile intent, we have no fear of them.

CONSIDERABLE feeling has been aroused by the action of the School Board in not promoting Miss Harries to the vacancy caused by the retirement of Miss Watson.

M. C. CAMERON, M. P., is asking the government to take a sound stand on the license question. He has given notice of a resolution reciting all the facts connected with the passing of the Dominion License Act, its reference to the Supreme Court, etc., and the confusion and inconvenience that have been caused by Dominion interference with the liquor traffic.

There are now in the library of this Institute close on two thousand volumes of miscellaneous books, to which the directors are frequently adding as the means at their disposal permit; and in the reading room about forty newspapers and periodicals—Canadian, British, and American.

RE-DISTRIBUTION OF SEATS.

It was a matter of surprise to both Reformers and Conservatives that Mr. Mowat did not make a redistribution of seats in 1882. The Dominion Government had shortly before made a shameful currying of the counties, under the pretence that the result of the census demanded a "readjustment" of the constituencies; and it was thought that the Ontario Government had the right to make at least a legitimate redistribution.

We learn, however, that a redistribution of seats, based on an average representation of about 21,000, will be made this session. Many of the ridings are badly unbalanced at present, owing to the changes in population during the past ten years. A redistribution has long been badly needed, and we are glad to see it taken in hand now. There will be no gerrymandering. The plan proposed is very fair. No county will be torn asunder in order to give the Tories or make a Grit preserve.

The following extract from the report of the Minister of Marine and Fisheries will be of interest to our readers, as three Goderich men, Capt. McGregor, W. Watson and T. O. Moorhouse, were on board the vessel when she made her explorations. Among other things the report says:

"Owing to the almost continually breezy weather, much of the work which would otherwise have been done in the open boat had to be accomplished in the vessel. This, among the many reefs in the vicinity of the entrance to the bay, was attended with considerable anxiety. In consequence, however, of the local knowledge and vigilance displayed by my sailing master and pilot, Capt. Alexander McGregor, and the unceasing attention paid to the engines by my chief engineer, Mr. Charles Linter, I was enabled to take the vessel in closer proximity to those dangers than under less fortunate circumstances would have been prudent. In the interests of this survey, I think it advisable the department should know that, to the crew, hydrographical surveying is extremely monotonous work, which is the hardest kind of all work—that, unlike seafaring men in other employments on these waters, they do not see their homes from the beginning to the end of it. That giving the depth of the water—a mistake in which may involve the loss of a vessel and lives—is a responsible duty, and can only be entrusted to intelligent and trustworthy men. The season for hydrographical surveying is necessarily shorter than that of other employments in which they would be engaged. I mention these circumstances to allow you that, in order to induce first class men to join and stay in this work, good wages must be given, and every material comfort that the circumstances afford. I am happy to say, for the credit of a Dominion Government vessel, that among thirteen working hands, placed occasionally in very tempting circumstances, that in the whole five months not the slightest suspicion of insubordination or disobedience occurred, and I trust that nothing will transpire which will prevent their re-joining, such being their present intention. The country suffers a great pecuniary loss by the time occupied in break-shag in new hands."

Wanted—An Electionist.

It would be a blessing if some of the electionists of the Dominion would come down to Ottawa and give some of the members of parliament a few lessons in talking distinctly. The annoying practice of mumbling is daily growing worse. The ministers make some of their most important announcements in a mumbling whisper. Sir John's voice is growing so untuned that it is now impossible to hear him two yards away. Only today Mr. Chapleau had to ask a Grit member a few seats from him what he was saying, and it is ten chances to one that the secretary of state does not now know what it was. Mr. Chapleau himself, although a lawyer, could well take a few lessons. Sir Richard Cartwright is the reporter's ideal of a parliamentary talker. When he talks even the doorkeeper in the lobby can hear him, and he has a pleasing voice in addition.—[World.]

The total receipts for the township of Stanley for 1884 were \$13,572.46, and the total payments \$13,292.79, leaving a balance of \$279.67. The amount paid to county treasurer, \$5,640.06. Schools, \$4,181.08. Roads, \$2,700.00. Salaries, \$577.80. Sundries, \$2,233.03.
