The Ideal Lenses For All Wearers of Spectacles or Eyeglasses

Luxfel lenses soften the light and at he same time improve the clearness of Most glass which softens the light dims the wearer's vision. But Luxfel glass, owing to its peculiar chemical makeup, which is different from any other, produces lenses which soften

the light and at the same time increase the wearer's acuity of vision. This is due to the fact that they absorb, or held back, a large percentage of the actinic or ultra-violet rays of light, allowing the eyes to exert their full power These ultra-violet rays are very irritating to the eyes, any excess of them
