All the resolutions sent from London were adopted, and will be presented to the Government.

The most important was that to give the council full control of all spending bodies in the city. That this will pass the Legislature is doubted, as the Legislature seems to lean towards decentralization, not centralization of municipal authority.

W. R. Meredith of this city protested against the amendment to the act, permitting the council to publish the names of bakers who do not live up to the bread act. However, the association adopted the idea, and it, will probably be made into law, as the delegates were unanimous.

WALL STREET REVIEW.
[Canadian Press.]

New York, Sept. 2—(Weekly Financial Review).—The shadow of the railroad strike hung over the financial market this week, the outcome still being very much in doubt at the close of yesterday's session of the stock exchange. Quoted values, particularly as to rails, were held in check by the tense situation, but the undertone was surprisingly strong, with new records for Mercantile Marines, Inspiration Copper and Kelly-Springfield tire, one of the better-known automobile accessories. United States Steel again held undisputed sway over the industrial division, repeating last week's high record of 99%. Minor steel and iron shares benefited by the strength of the leading issue and coppers and other metals were substantially responsive to favorable trade conditions, as well as inograssed or extra dividend disvell as increased or extra dividend dis

The success of the new British two-year loan was without appreciable effect on rates to London, which held about steady. Features of the foreign exchange markets were the decline in marks or German remittances to 69%, the lowest quotation since the beginning of the war, and an advance of over 3 points to 34.60 in the rate of Petrograd. Business was maintained at recordbreaking pace and railroad tonnage was limited only by shortage of equipment. Grains and other foodstuffs are being rushed to market and the enormous bank exchanges and clearings at reserve centres are in themselves strong proof of the easy money situation.
