

BRIG. IN ARMY GETS PROMOTION

Chief of London Division of the Salvation Army Made Lieutenant-Colonel.

Following a colorful career which began with the Salvation Army in 1889, Brigadier MacAmmond, chief of the London division, was today the recipient of the congratulations of the Salvationists upon his promotion to the rank of lieutenant-colonel.

Lieut.-Col. MacAmmond entered the service in the old Imperial training corps in Toronto 36 years ago as a cadet, and upon graduation was made a lieutenant. He has held several commissions in different parts of Canada and has taken part in practically every branch of the army work.

Two years after his commissioning as a lieutenant he was made a major and has steadily risen.

In Montreal, Lieut.-Col. MacAmmond was arrested and jailed for teaching on the street corners. That was when he was an ensign, not long afterwards, in a last case, he won the right to teach on the streets in Quebec.

In Toronto he was assistant social secretary, under the late Col. Reese.

There he was promoted to the rank of major. Five years ago he was sent to North Bay, and then to the city and doing duty as a street sergeant. The commandant at that time was not connected with the army, but was a chief on a private car travelling in the west. They are now working together.

The army has a host of friends evidenced by the generous donations made this year. Upwards of \$5,000 more than last year has been received to date, says Commandant Hurd, who is the credit officer.

Two promotions were made in Toronto. Lieut.-Col. Aaby becomes colonel. Lieut.-Col. John Noble has also been made a colonel.

TREASURE SHIP DIVERS GUARDED FROM ATTACK

Continued from Page 1.

have been the object of much curious attention from passing craft. For a long time, the government's anti-rum fleet was very suspicious of the expedition and gave it a good deal of annoying attention. This was undoubtedly due to the fact that the members will respond to London's invitation to meet here in 1925.

Leaving New York harbor on June 4, a government hydroplane, called the "Merida," was sent to inspect the boats and divers. For a day and a half, the "Merida" hovered over the water near Fort Hamilton, and then alighted on the water to make its report. That report was entirely satisfactory.

It was indicated by the fact that the "Merida" was sent to inspect the boats and divers. For a day and a half, the "Merida" hovered over the water near Fort Hamilton, and then alighted on the water to make its report. That report was entirely satisfactory.

A week later, when the expedition put into Norfolk for fuel and water, after the first few days of swimming in the ocean bed, the prohibition forces were on the alert. An inspector from the government's shore forces came aboard, reinforced by two coastguard boats, whose officers made a thorough search of our ships from stem to stern. Their inspection was microscopic; they tapped several of the buoy barrels and looked over the mysterious cargo of bottles.

Two hours later they left our ships, passing them as free of rum, and we have had no trouble with the prohibition navy since that time.

The search for the hulk of the "Merida" was no light task. It involved "sweeping" more than 100 miles of the ocean bed. Infinite patience is required for this task. The "sweep" is a steel cable the size of a rope, and weighs so that one mile of its length lies flat on the ocean bed, which at this point has an average depth of 20 fathoms.

HAILSTORM CAUSES BIG LOSS IN WEST

Thousands of Dollars Damage Done to Crops Near Weyburn, Sask.

Weyburn, Sask., July 8.—One of the worst and most devastating hailstorms that has been experienced in the Weyburn district struck close to the city yesterday taking a heavy toll in the crop of the district. The storm came from the north, hitting north-east of the city and travelling south, meeting with the one from the south-west. Quite a large number of the farmers in the area suffered a total loss while some suffered from 30 to 50 per cent.

PAINTERS' CONVENTION MAY MEET IN LONDON

Efforts are being made today by the chamber of commerce to secure for London the next convention of the Canadian association of House Painters and Decorators.

HAIG BECOMES MEMBER OF GUARDS ASSOCIATION

Winnipeg, July 8.—Field Marshal Earl Haig became a life member of the Guards Association when he visited the headquarters of the association here yesterday.

Sergeant-Major J. Woods pinned the life membership badge on the Field Marshal. The sergeant-major's mother, who had twelve sons in the army during the great war, watched the ceremony and was later introduced to the Earl and Countess Haig.

They have all the weird superstitions of the sea, one of the most persistent being that good luck for the ship is brought by the expedition. Most of their idle moments are spent in deciding what they will do with the money. Mike Olson will be the first to give himself a year's vacation on the land. Pete, who ends with a "hang," will see some of the country.

Finding the Merida. The "sweep" which resulted in locating the wreck of the Merida came at the end of the afternoon of June 21—the longest and probably the hottest day of the year. After our steel cable had been twice cut in two by the saw-edge of the Merida's prow, we at last caught a "hang" which held firm as an anchor. Slowly the two ends of the 13,000-foot cable were brought together, so as to pinch the "hang." Both ends were then hauled in until the cable was straight up-and-down in the water.

Heat Wave Kills 9 In New York

Associated Press Despatch.

New York, July 8.—The second day of the heat wave which swept down upon the east from the west has caused nine deaths directly and indirectly and dozens of prostrations.

Violent thunderstorms in most sections up for work quickly, but we were worried by people who operate these camps and resorts," Dr. McNally stated today. "We made recommendations to the health officer, who today completed a Western Ontario survey. Dr. McNally and his assistants have investigated such places in the counties of Middlesex, Elgin, Kent, Essex, Lambton and Oxford. They are reporting now to the provincial department of health.

The survey has lasted several weeks and has carried the health authorities into practically every summering place in Western Ontario. Dr. McNally's territory includes only the counties, though they have only co-operating powers with the cities of Windsor and London.

"We went about our work quietly, but we were worried by people who operate these camps and resorts," Dr. McNally stated today. "We made recommendations to the health officer, who today completed a Western Ontario survey. Dr. McNally and his assistants have investigated such places in the counties of Middlesex, Elgin, Kent, Essex, Lambton and Oxford. They are reporting now to the provincial department of health.

"There appears to have been little attention paid to sanitary conditions in some of the camps and resorts," Dr. McNally stated today. "We made recommendations to the health officer, who today completed a Western Ontario survey. TOURIST CAMPS ARE INSPECTED

Dr. McNally, District Health Officer, Completes Wide Survey.

Close attention to water supplies and sanitary conditions at summer resorts, tourist camps, roadside inns and refreshment stands is advocated by Dr. T. J. McNally, provincial health officer, who today completed a Western Ontario survey. Dr. McNally and his assistants have investigated such places in the counties of Middlesex, Elgin, Kent, Essex, Lambton and Oxford. They are reporting now to the provincial department of health.

The survey has lasted several weeks and has carried the health authorities into practically every summering place in Western Ontario. Dr. McNally's territory includes only the counties, though they have only co-operating powers with the cities of Windsor and London.

CLOTHES HINTS NOT NEEDED BY WOMEN TEACHERS HERE

Administrator Wheable Comments on Neatness Which Beautifies Local Profession.

EXTREME IN U. S.

Good Taste Brings Praises From Principal Miller—Higher Pay Helps.

"The beauty a woman can bring into a home by artistic dress and surrounding should be a part of her contribution to education," was the statement of Dr. Payson Smith at a recent gathering in Indianapolis. London teachers should be a little prouder when they learn that those holding important positions of the county, though they have only co-operating powers with the cities of Windsor and London.

The regulations of the Ontario board of education contain the information that, by precept, teachers should form habits of neatness and politeness among the children. In connection with the former item—neatness, Administrator G. A. Wheable stated that the teachers of these people, who are the children of a rule, and that they did endeavor to please, the children by their clothes as well as by their personality and method. "An attractively dressed teacher of the male type, as well as the woman at the head of the class, will be noticed by the young people and are often copied."

It was noted that in the teaching profession in Canada the men and women were of a much finer type than in the United States at the time. That makes a great difference in the question of clothes and it has not, so far, been necessary to criticize the teachers in Canadian schools along that line.

Better Pay Helps. There was a time, a few years ago, Mrs. John Rose stated, when the teachers of this county were well paid and they could not afford to dress attractively. At the present time, however, wages have gone up and she said that some of the women were in looking attractive.

"The keynote of being well dressed is being suitably dressed," she stated, and the teachers in the London schools are suitably dressed. At recent dinners given by the secondary school teachers, the members of the women's teachers' association of the county, which Mrs. Rose attended, she spoke highly of the beautiful way the teachers were dressed and of the fine quality of their looks as well.

LONDON-INGERSOLL SWIM RACE PLANNED But It Will Take Place in the Thames Park Pool As Course Is Lacking.

A swimming marathon from London to Ingersoll is being arranged by Jerry Goodwin, chief supervisor of London's playgrounds. The long swim will occupy several days and there are said to be many number of local boys desiring to compete.

Owing to the lack of navigable water between the city and Ingersoll, the swimming race will be staged in the Thames park pool. Arrangements are being made for the erection of a large map there for the purpose of the river, displaying the two centers, on which the distances will be accurately calculated. Colored flags will record the distance swum at a given time. Supervisors will record the daily distances covered by competitors in the big tank, and the one who swims the greatest distance in the shortest time will be conceded to have won the race. The scheme is expected to attract much interest in the art of swimming.

Fire In Oil Field Causes Big Loss Damage At Cross Roads, Arkansas, To Exceed \$750,000.

Associated Press Despatch. Eldorado, Ark., July 8.—Fire which caused \$750,000 damage at Cross Roads, newest oil boom town, was under control today and no further loss was expected.

The giant gusher of the Natural Gas and Petroleum Company, which is burning at the rate of 50,000 cubic feet a day, was barely saved from the flames, which originated 200 yards away in the treating plant of the Imperial Oil and Gas Products Company.

The fire swept four wells and six earthen pits. Removal of the burning pits and the hurried digging of ditches saved wells and storage pits in the path of the fire.

MAJOR TAYLOR PROMOTED. Among the promotions of Salvation Army officers announced from headquarters today was that of Major Taylor, editor of the War Cry. Major Taylor has been made brigadier.

RATIFIES TREATY. Associated Press Despatch. Paris, July 8.—The French chamber of deputies today ratified the Washington 8-hour convention.

JOHN D. ROCKEFELLER

is 86 years old today. His program for celebration of the event at his summer home at Tarrytown, N. Y., included a round of golf on the golf course, a family dinner with a big birthday cake and an organ recital. A message given out at the estate today reads: "Mr. Rockefeller is well and full of good cheer and gratitude for all the blessings that the coming year holds for him."

COOL SNAP GREETED WITH CONSIDERABLE JOY WOMAN IS RETURNED TO ESSEX RELATIVES Gladys La France, Deported by U. S. Taken Back Home.

Gladys La France, who was deported from Michigan some six weeks ago by American authorities, has been driven to the home of her relatives by Governor Byron Dawson of the county jail. The woman's mental condition was found to be quite satisfactory by Jail Physician Dr. James D. Wilson, who cannot explain why the woman was deported from the United States.

After delivering the woman to her relatives, Governor Dawson and his wife spent the week-end with relatives at Adrian, Mich., and also visited Governor Dawson's cousin, Dr. Nixon, Holliday, Mich.

FRENCH BALLOON WINS. Lyons, France, July 8.—The French balloon "Marie Jeanne" piloted by a Canadian, won the 100th annual grand prize race which was started from here Sunday. Auger landed at Mandelieu near Cannes, a distance of 285 kilometers. The winner of the 100th annual grand prize race, covered only 120 kilometers and was given sixth place.

LEGISLATION ALONG THIS LINE MAY BE PASSED AT NEXT ONTARIO SESSION. Toronto, July 8.—The Toronto Star today said that the Ontario Legislature is likely to be introduced at the next session of the Ontario Legislature to make it an offence for a contractor to perform a second marriage when the contracting parties are already married.

"This statement was made to the Star today by J. C. Lewis, M.L.A., who represents the Northeast Toronto riding. The promise of action by Mr. Lewis was the result of the statement by the Ontario Legislature to make it an offence for a contractor to perform a second marriage when the contracting parties are already married."

BOARD TACKLES BUILDING TASK

Appointment of School Construction Supervision Committee To Be Made.

Appointment of a building committee to supervise the erection of the new East London collegiate will be the principal item of business at the regular monthly meeting of the board of education tomorrow afternoon at 4:30.

Discussion of the plans for the proposed building will be premature, in the opinion of Chairman F. S. Lawrason, and will not likely come up at the meeting, although he points out that it will not take very long to put plans already prepared into shape for the commencement of the building. In the case of the Empress avenue school the shape of the building and the location of the building made necessary the alteration of plans, but this problem will not arise in the case of the East London collegiate as the site is at right angles to the street line.

Mr. Lawrason was unwilling to comment on a proposal attributed to him, to build both south and east wings, but he said that as one of the trustees he would not be possible to build both schools with the money available since plans for the East London collegiate already tentatively drawn up call for an expenditure of about \$200,000.

Funds available for the purpose of about \$240,000, too small, they claim, to be divided between the two schools.

Legislation is likely to be introduced at the next session of the Ontario Legislature to make it an offence for a contractor to perform a second marriage when the contracting parties are already married.
