

THE HARROW THAT DOES THE WORK

Hundreds of Farmers can add their Unwritten Testimony

LOT 12, CON. 11, CHATHAM TOWNSHIP.
T. E. BISSELL.—We the undersigned farmers met on the farm of Samuel Wallace, Lot 12, Con. 11, Township of Chatham, to test the working of different Disk Harrows on hard clay, unplowed and stubble that Mr. Wallace tried to plow and could not plow it with either the gang or one-furrow plow. We had four different makes of Disk Harrows in the field—The American (Detroit or Windsor), the Flury, the Non a, and the T. E. Bissell, or Prescott. We found the Bissell Prescott did more work going once over than any of the others going four times. Twice over with this machine made a clean cut five inches deep, while twice over with any of the others did not cut one third of the surface and no tie. We could not believe this had we not seen it. We would not buy any of the other harrows after seeing the Bissell Prescott work. (Signed) J. L. Holwell ex-Reeve Chatham Township; James Martin, Absolom Davis, W. J. Oulton, Samuel Wallace, Chas. Latimer, W. J. Rollins.

MR. DAVIS AND MR. WALLACE EACH BOUGHT A HARROW AFTER THE TRIAL

Manufactured by T. E. BISSELL, Fergus, Ont.

Hogs.

The market was lower last week for choice bacon hogs and supplies were light. The best selections, weighing from 160 to 200 lbs., sold at \$4.25 to \$4.37½ per cwt. off cars, unfed and unwatered. Light hogs brought from \$4 to \$4.20 and thick fats of all kinds \$3.75 per cwt. At Montreal packers are paying about \$4.25 for good mixed lots, and \$4.35 per cwt. for nice light bacon hogs. A steamer sailing is reported in the London, England, market for bacon, with a better demand. The decline of 1s. a week ago has caused more business to be done. Canadian lean sides are quoted at 36s. to 38s. and stout and fat sides at 32s. to 34s.

The "Queen" Churn.—We take the following description of this churn from the circulars of the manufacturers. "It is easy to operate, as it is filled with roller bearings. There are no cranks to turn. By a simple device the barrel is secured to the frame, resting on roller bearings and the churn revolves with the slightest touch of the operator. It does not get out of order, as in its construction the acme of simplicity and durability has been reached. The frame is mounted on wheels, thus allowing the churn, while in the frame, to be easily moved anywhere. It is well made, well painted and is an ornament to any home. It is cheap and durable. Will last a lifetime. It has been thoroughly tried and tested by expert butter makers who find that a churning can be done in one-half the time it takes with ordinary churns and a much higher grade of butter is produced." Write to The London and Petrolia Barrel Co., London, Ont., for full particulars. See advertisement on page 408.

EASTERN TOWNSHIPS AGRICULTURAL ASSOCIATION.

The Eastern Townships' Agricultural Association held its annual meeting recently at Sherbrooke, Que. The annual report, as read by the secretary, showed that the past year was the most successful in the history of the Association. The actual receipts were \$18,897.81, an increase of \$2,121.64 over the previous year.

EASTERN POULTRY SHOW.

The fifth annual exhibition of the Eastern Ontario Poultry and Pet Stock Association took place at Brockville, Ont., last week. The number of birds shown was the largest in the history of the association, there being upwards of 7,200 on exhibition. The principal poultry breeders in Eastern Ontario, as well as some from Toronto, were on hand with their best stock. Mr. Sharp, Butterfield, acted as judge. During the show Prof. Robertson delivered an address on raising poultry for the British market.

The Machines That Made America Famous

Everything that bears the name **DEERING** is up-to-date.

That is why our competitors claim their machines as good as the Deering.

Deering Twine

Smooth and Strong
Even and Long.

Main Office and Factory:
CHICAGO, U.S.A.

Permanent Branch House:
LONDON, ONT

THE RAZOR STEEL, SECRET TEMPER, CROSS-CUT SAW

WE take pleasure in offering to the public a Saw manufactured of the finest quality of steel and a temper which toughens and refines the steel, gives a keener cutting edge and holds it longer than any process known. A saw to cut fast "must hold a keen cutting edge." This secret process of temper is known and used only by ourselves. These saws are elliptic ground thin back, requiring less set than any Saws now made, perfect temper from tooth to back. Now, we ask you, when you go to buy a Saw, to ask for the **MAPLE LEAF, RAZOR STEEL, SECRET TEMPER SAW**, and if you are told that some other saw is as good, ask your merchant to let you take them both home, and try them, and keep the one you like best. Silver steel is no longer a guarantee of quality, as some of the poorest steel made is now branded silver steel. We have the only right for the "Razor Steel" brand. It does not pay to buy a Saw for one dollar less, and lose 25 cents per day in labor. Your saw must hold a keen edge to do a large day's work. Thousands of these Saws are shipped to the United States and sold at a higher price than the best American Saws.

Maple Leaf Saw Set

Directions.—Place the Set on the point of tooth as shown in the above cut, and strike a very light blow with a tack hammer. If you require more set, file the tooth with more bevel. If you follow directions you cannot make a mistake. Be sure and not strike too hard a blow, and it will set the hardest saw.

Manufactured only by **SHURLY & DETRICH, Galt, Ont.**
