NEW ENTERPRISE

7B call the attention of our many readers to the commendable method employed by the Co-Operative Knitting Company of this City, of employing people at their homes on the co-operative City, of employing people at their homes on the co-operative plan, whereby the interests of the company and their employees at once become mutual. This method has been successfully employed in the manufacture of various kinds of goods in many parts of Europe, and we cannot see why the same co-operative method should not be equally successful in this country. Therefore we wish to congratulate the promoters of this company in the introduction of this method to the people of this country, thus enabling them to secure profitable employment at home. By this co-operative plan those wanting employment get a \$20 machine and outlit free. Five company for its part turnishes the knitters the necessary yarn, patterns, instructions FREE, and money to pay them for their work, superintends the business and takes for its part the profits derived from the products of the labor of the knitters. All the workers naturally have the welfare and interest of the company at heart and bend their energies to assure it of success, as their interests and that of the company are mutual. The workers cannot hope for the company to succeed without the proper eifort and hearty co-operation on their part as they are virtually a part of the company. Thus it will be seen that the company employing people at their homes, doing business on the co-operative plan, will necessarily succeed, whereas other companies doing business, by the old method cannot hope to successfully compete with the co-operative plan. We feel it of importance to many of our readers that they should write for a membership and avail themselves of the opportunity of taking employment at home with this Co-operative Company.
