···· New Markets for Wheat

pany

St. Paul, Minn., May 28.—James J. Hill believes that the hope of the American farmer lies in an Asiatic market. "Suppose," he said to-day, "our wheat trade with China alone to amount to 1 cent per capita for each day in the year, that would amount to 14,000,000 a day—nearly 14,000,000,000 a year."

mearly \$1.00,000,000 a year."
Mr Hill believes that an Asiatic market can be secured for the American
farmer's wheat. He bases this belief on
the fact that "wherever wheaten flour
has been introduced to any race, with
the single exception of the black race,
they are ready to consume it from that He believes this so firmly that building the largest steamers that the world has seen to carry the wheat of the Pacific coast to China, Japan, the Straits Settlements and other Or.ental
