Kidney Lesions in Malaria.....	860	PUBLISHER'S DEPARTMENT—	

Why Not ?

Why not prescribe cream and call it something "just as good as cod-liver oil?"

Why not prescribe petroleum oil or kerosene and call it a "substitute for cod-liver oil?"

Because

There is no other oil like cod-liver oil. No other oil has the slightest resemblance to it in therapeutic power. No other oil is recommended in its place by a single authority on therapeutics.

It is a clear case of cod-liver oil—or nothing.

Scott's Emulsion

Contains the whole oil, thoroughly emulsified, and combined with the hypophosphites and glycerine. It has been the one standard for a quarter of a century. It never separates, and is practically odorless and tasteless.

SCOTT & BOWNE, Toronto
