

The Outdoor Boot

Here, at last, is a sensible and shapely piece of footwear—designed and built for the man who spends at least part of his time out of doors, in the "silent places" where there are no cobblers to repair leaks and breaks, and where a boot must be staunch and true in every detail of making and material.

A Western Boot for Western People

Comfort, durability and shapeliness combine in this magnificent "Leckie" boot, which is built from a knowledge of western requirements to meet western needs. The leather is soft, yet tough and almost everlasting, being thoroughly cured and dressed; the sole stitching is done by the famous "Goodyear" process, which has superseded hand sewing, being better and more dependable. Three colors to choose from in a complete range of sizes; height, 14 to 16 inches.

Adds to the Pleasure of Outdoors

Prospectors, sportsmen and all who aim to keep their feet warm and comfortable should ask their shoe dealer about this famous boot. He will be glad to show it to you, and show you other "Leckie" lines for street and evening wear. "Leckie" boots are the greatest shoe value in the west—perhaps in the world. Ask for "Leckie" boots and cut down expense while eliminating foot trouble. The name "Leckie" is an absolute guarantee of satisfaction.
