

- (a) the nuclear material shall not be used in any way that would result in a nuclear weapon or other nuclear explosive device;
- (b) the nuclear material shall only be used in the OECD Halden HBWR reactor;
- (c) the nuclear material shall be subject while in the territory of Norway to safeguards to be applied by the IAEA pursuant to the agreement between Norway and the IAEA identified in the first paragraph; should the IAEA for any reason not apply such safeguards, our two governments shall forthwith enter into an agreement for the establishment of comparable safeguards satisfactory to the Government of Canada;
- (d) the nuclear material shall be retransferred beyond the territory of Norway only as agreed in advance in writing by the Government of Canada and the Government of Norway;
- (e) the Government of Norway shall apply a level of physical protection to the nuclear material commensurate with that set out in IAEA Document INFCIRC 225/Rev. 1 and any other relevant international agreements;
- (f) the Government of Norway shall establish and maintain a system of accounting for, and control of, the nuclear material concerned,
