People who suppose Nova Scotla to e decadent are entitled to one more this sea-girst province is forging ahead. There is no better place to-day for a man who has brains and is willing to work-not even the great Northwest. Our general impressions about any ocality, to us personally unknown, are locality, to us personally unknown, are usually vague and almost always erroneous. The citizen of each country is prone to assume, not only that his land is the best, but that all other lands are decadent. One of these toothsome tablets works wonders for digestion. Soon as placed in the mouth it starts

the Saliva flowing, which at once gets to work dissolving it.
The Salive becomes blended with the Candy Cascaret tablet, and from the moment they start going down your

throat together they start working together. Now, what do they work at? Bowe!-

work, of course,-Digestion.

"Some folks think Digestion takes place" in the Stomach only. But that's a great mistake! Most of the Digestion occurs in the

thirty feet of Intestines that connect with the Stomach. Now, these Intestines are 30 feet long,

for a purpose. They are lined with a set of little mouths, that squeeze Digestive Juices into the Food eaten.

The Digestive Juices thus mix with

ECAY is not digestion, you the food, just as Saliva mixes with Casknow, even when it takes caret tablets, dissolving and changing that food into nourishment, as it passes

The Intestines are also lined with millions of little suction pumps, that draw the Nutriment from Food, as it passes ing to how long it remains in the Bowels them in going through.

This Nutriment is then carried into the Blood, and spread over the Body as Brain, Bone and Brawn.

But, when the Bowel-Muscles are weak, the Food moves too slowly to stimulate the little Gastric Mouths and there is no flow, or too little flow of Digestive Juice, to change the food into nourishment. Then, the food decays in the Bowels,

and in the thirty feet of Intestines. When this Decay begins the little suction pumps draw Poison from the decayed Food, into the blood, instead of the Nutri-

tion it should have drawn. Now, Cascarets contain the only combination of drugs that Stimulates these Muscles of the Bowels and Intestines just as a Cold Bath, or open-air Exercise, gain:

Tanner, M.L.A. He is of rather slight physique and in many respects resembles our own Herb Lennox of Aurora. He is a hard hitter and the premier regards him as a clever poli-tician. He lives at Pictou, and at the last election proved that he possessed no little personal popularity, especial-

ly among th miners.

In Cape Breton Messieurs Maddin and Butts cut down the government majority almost to the vanishing point. There is soon to be a by-election in this riding, and Mr. Butts will be the Conservative candidate. He is a young lawyer who worked, as a boy, in the mines and makes a strong, aggressive speech on the sturm. speech on the stump. At the Sydney Mines meeting on Labor Day the crowd seemed more anxious to hear from Butts than they did from any one else. Should he carry this by-election it will mean much for him and it may vestibule some remarkable changes in the political history of Nova Scotia.

strong and unaffected. His home is at least a mile from North Sydney, but he walks the distance, whatever the roads or weather, and could probably walk from Sydney to Halifax, with no very great fatigue. He absolutely declines to read any significance into the vote of last June, and considers his government as quite approved by the provincial operations.
