CROSS CUT ON DAVIDSON NOW IN THIRTY FEET

Location of Vein at Three Hundred Foot Level Awaited Before Mill is Installed.

Word was received from Porcupine on Saturday that the crosscut at the 300-foot level on the Davidson is in about 16 feet and that a number of quartz stringers, ranging in width from one to four inches, are showing strongly in the face. On the 200-foot level the ore body was cut about 75 feet in from the shaft, and the indications are that it will be received. tions are that it will be reached on the lower level within the next two o

lower level within the next two or three weeks

The management is awaiting the results of development at 300 feet before going on with the plans for the installation of a mill, as its size and character will be determined by the size and value of the ore body. On both the 100 and 200-foot levels the ore ran considerably higher than the average for the camp, and everything points to the fact that the mine will be a high-grade proposition. On the be a high-grade proposition. On the 100-foot level the vein is 21 feet wide and at 200 feet has widened to about 40 feet, so that an enormous tonnage is assured.

40 feet, so that an enormous tonnage is assured.

A contract has been let for the sinking of a shaft on the new vein discovered on the south lot a couple of weeks ago, and this will be put down to the 100-foot level. As the vein gave some of the richest ore ever taken out of the camp the management is confident that another extensive ore body will be developed at ment is confident that another extensive ore body will be developed at this point. Whother or not the sinking operations will be continued immediately to the 300-foot level will depend on the results at 100 feet.

Davidson Find Freely

Impregnated With Gold

A new vein has been found south of the shaft on surface at the Davidson Gold Mines Company's property in northeastern Tisdale, says The North northeastern Tisdale, says The Northern Miner. It is sugary quartz and is plentifully impregneted with free gold on surface. Some remarkably fine specimens have been taken from surface on the main vein some distance from the shaft.

Crosscutting is now being carried on at the 309-foot level. If results are as encouraging as on the first and second level there will be quite a quantity of milling ore blocked out. The vein to which most attention is being directed is wide and carries

LA ROSE IN KIRKLAND.

The La Rose Consoldated has taken an option on the Hurd claims short distance south of the Tough Oakes in Kirkland Lake. A small gang worked for some time on these claims and a promising looking vein developed thru test pits. The La Rose will start development work at once. The claims are owned by Megsrs. Hurd and West of Philadelphia, who are also interested in the Lucky Cross at Swastika. The La Rose will be the second

Cobalt company to become interested in Kirkland Lake. The Teck-Hughes controlled by Buffalo interests .-Northern Miner.

HOLLINGER-RESERVE TO RE-

By Special Correspondent. Timmins, Oct. 7.—Barney McEnancy, who purchased the Hollinger Reserve, Ogden Township, at auction is considering reopening the mine at an early date. The Reserve was supposed to be well on the way toward a profitable mine when financial difficulties caused its closing.

N. S. STEEL PRODUCTION

DOUBLED IN YEAR Col. Cantley, president of the Nova Scotia Steel and Coal Co., says that his company is turning out steel billets at the rate of 15,000 tons a month, as compared with less than half that

For the current calendar year he estimates the total output for the Dominion of Canada at 1,500,000 tons, as compared with a previous high record of 1,350,000 tons in 1913. Last year the cutput was 975,000 tons. Despite the larger output, Col. Cantley is of the opinion that the steel famine in Canada will continue for the rest of the ada will continue for the rest of the year, and there will be no relief after the turn of the year after making due allowance for the new plant that is being nut down being put down.

President Cantley believes that the entire world is now starved for steel for normal requirements. He looks for an abnormal domestic consumption in the United States during the next few the United States during the next rew vears, and as soon as financing and shipping permits there will be a very large and abnormal world demand outside the sphere of the war, and if that ends, the replacement of the destroyed industries and the readjust. stroyed industries and the readjust-ment of those in the United Kingdom will call for very large quantities.

NEW YORK BANK STATEMENT. New York, Oct. 7.—The statement of the actual condition of clearing house banks and trust companies for the week shows that they hold \$82.505,480 reserve in excess of legal requirements. This is a decrease of \$5,634.090 from last week.

LONDON OILS.

London, Oct. 7.—Calcutta linseed (Oct. and Nov.), 81s 6d; linseed oil, 39s 6d; sperm oil, f46 10s; petroleum, American refined. 1s 1½d; spirits, 1s 2½d; turpentine, spirits, 43s; rosin, American strained, 21s 3d; type "G." 21s 9d.

WINNIPEG GRAIN MARKET. Winnipeg, Oct. 7.—Wheat closed 21/sc higher for October at \$1.68%, 21/sc higher for November at \$1.66%, 21/sc higher for December at \$1.61% and 21/sc higher for May at \$1.621/s. Oats were unchanged for October, 1/sc higher for December and 1/sc lower for May. Barley was unchanged at 9c. Flat was unchanged to 1c lower.

The trade during the day was fair, with a very active market. The denial of peace rumors and rain in Argentina made wheat strong at/the opening. A sharp break followed on talk of the Dominion Government commandeering wheat, but the Conservative men paid little attention to these rumors and wheat rallied to close near the highest of the day. Cash wheat was only fair. Oats were fairly steady.

LIVERPOOL MARKETS.
