PROFITABLE BEEF PRODUCTION

(Experimental Farm, Nappan.)

The results obtained at the Experimental Farm at Nappan in feeding good stockers, heavy fed vs. good stockers, light fed, were as follows:

Eight steers were selected, in such condition that they could be classed as good stockers. These were dehorned and fed a preparatory ration for a few weeks previous to starting the test, in order to get them accustomed to their feed and surroundings, then divided into two lots of four each. The heavy fed, or Lot 1, were given 50 per cent. more roots and meal than were the four light fed, or Lot 2. Number of days in test 98 ; total weight at the beginning for Lot 1, heavy fed, 4,578 pounds; at finish, 5,295 pounds, an increase of 722 pounds. For Lot 2, light fed, at beginning, 4,206 pounds; at finish, 4,880 pounds, an increase of 674 pounds.

The original purchase price was 6.25 cents per pound live weight. The selling price was 8.1 cents per pound. The gross profit for Lot 1 was $143.09; for Lot 2, $132.40. The total cost of feed for Lot 1 for 93 days was $99.16; for Lot 2, $75.29, leaving a net profit for Lot 1 of $43.93, or a profit per steer of $10.98; for Lot 2, a net profit of $57.11, or per steer $14.28, a difference of $3.30 per steer in favor of the light fed.

The average profit per steer for three years, over and above the cost of feed at market prices, was for Lot 1, $16.06; for Lot 2, $18.05 ,a difference of $1.99 per steer in favor of the light fed. The average cost for three years to produce one pound of gain was 11.08 cents in the case of the heavy fed and 9.57 cents for the light fed. The ration fed to Lot 1 at the beginning of the period was 60 pounds roots, 6 pounds meal, 1 pound molasses. At the finish 40 pounds roots, 16.5 pounds meal, 2 pounds molasses. For lot 2 at the beginning 40 pounds roots, 4 pounds meal and 1 pound molasses; at the finish 30 pounds roots, 11 pounds meal and 2 pounds molasses. The meal mixture was made up of 200 pounds of ground oats and barley (equal parts by weight), 200 of bran, 50 of oilcake, 50 of cotton seed.

The meal mixture cost $1.50 per hundredweight; roots were valued at $2 per ton; hay at $8 per ton; and molasses cost 20 cents per gallon.

It will be noted that the greater profits were realized for the lighter fed steers. Similarly the light fed good butchers, as per results given in series one, gave the greater profits, but a greater difference was noted in the good butchers, light fed, than in the above instance, which would naturally be expected because the former are too advanced to make the same profitable use of the food consumed as would the latter. Nevertheless there appears to be a profitable limit in the amount fed, even to good steckers, as the above test verifies, as it also does, that good profits can be realized by the proper finishing of good beef.

RECENT WEDDINGS

Perkins-Bartlett.

St. Matthew's Presbyterian church was the scene of a pretty wedding at 4 o'clock yesterday afternoon, when Viola B., second daughter of Mr. and Mrs. Samuel J. Bartlett, 117 Adelaide street, became the bride of Christopher C. Perkins, formerly of West St. John and now of the 236th kiltie band. The ceremony was performed by Rev. John Hardwick. The bride looked charming in a tailored suit of sand color, with picture hat to match. The bride was attended by Miss Julia Perry of Fredericton, who wore a suit of grey with large picture hat, while George Thompson, of the I. C. R. office, supported the groom. After a wedding supper, served at the bride's home, Mr. and Mrs. Perkins left on the C. P. R. for a short honeymoon through the maritime provinces, after which they will make their home, for the present, in Fredericton. The numerous gifts testified to the popularity of the young couple.

MAY SOON BE $2 WOOL

(Toronto Globe)

It is reported from the Boston wool market that wool will soon be $2 a pound. The supply is getting very short. The appointment of the Canadian wool commission by the federal department of trade and commerce at Ottawa, is apparently accepted by the textile trade as a very satisfactory move. The many textile interests are now satisfied that each firm will be guaranteed a fair apportionment of wool, based on previous consumption. It is affirmed that this is the only way of bringing about an equitable distribution of what little wool can be obtained in Australasia and elsewhere. There have been no statements from the west as to what definite attitude the sheep farmers will adopt towards the new commission.
