ONT. ANTICIPATES DEFICIT ON HYDRO

Rates No Higher, Loss to be Carried From Previous Reserve.

TORONTO, May 16—The fear was expressed in the annual report of the Toronto Hydro Electric Commission just issued that while there was a surplus of \$31,928.35 for the year just closed, the present rates would not be sufficient to make ends meet for 1923. An increase in rates was not contemplated, however, as the commission proposed to draw on its reserve with the hope than an improvement in business conditions would enable it to meet all charges with the existing scale. Increasing cost of power supplied by the Ontario Hydro Electric Commission was the reason given for anticipating a deficit.
