October 20, 1906.

Western farmers and employers of labor in general find it impossible to secure all the workers they require. The employment of labor has been steady, and advantageous to all workers.

all workers.

The emigration into Canada this year numbers 200,932.

Of these, 141,064 arrived from Europe, and 59,329 arrived from the United States. The emigration into Canada in 1905

was 145,336; that is up to corresponding dates, the end of August of each year.

As you will see by the bank's statement of 20th ult., its business continues to increase. Your directors therefore ask As you will see by the pank's statement of 29th uit., its business continues to increase. Your directors therefore ask your assent to a further issue of new stock, say \$500,000, at such time (perhaps soon) as they think advisable. They feel that the funds can be employed safely as calls are made,

in same manner as in former issues.

I have much pleasure in moving the adoption of the

annual report.

The motion for the adoption of the report was seconded by Mr. S. H. Ewing, vice-president, after which the president invited discussion on the report, stating that the directors would like to have the assent of the shareholders to the issuance of the proposed new stock, when it was considered by the directors by the directors

Discussion on the Report.

Discussion on the Report.

'Mr. J. W. Molson: What is the idea of the directors as to the premium, at which the new stock shall be issued? Have they taken it into consideration?

The President: We have considered that the proper price would be 200. This is rather over what the former issue was made at; it was 100.

'Mr. A. G. Watson: The very fact of the statement showing that we are only \$5,000 worse off in profit and loss than we were last year, after allowing \$145,000 for bank premises at branches and \$10,000 conttributed to the officers' pension fund, is, I think, very gratifying to every shareholder, small or large. I am quite pleased to give my mite to the officers' fund. Might I ask, Mr. President, if I understood you to say that the new stock would be issued at 200?

The President: That is what we thought.

Mr. Watson: I think it is a little close to the price.

Mr. H. Markland Molson: Our Rest stands at 100 per cent, of the capital, and the issue is in proportion of Rest to capital. The stock is selling at 223 to 225, and the new stock will be at 200.

The Vice-President It will be one there in air

capital. The stock is selling at 223 to 225, and the new stock will be at 200.

The Vice-President: It will be one share in six.

The General Manager Some years ago the capital was authorized to be increased to \$5,000,000, and when setting the assent of the shareholders to that application to parliament, we promised that it should be issued in portions of, probably \$500,000 at a time, but the directors promised that it would not be issued without getting the assent of the shareholders; and that has been done each time.

The motion for the adoption of the peports was then carried unanimously after which Mr. J. W. Molson moved:

"That the directors be authorized to issue \$500,000 new stock to the present shareholders, pro rata in the same manner as provided in by-law it, adopted by the shareholders on the 23rd February, 1003."

This was seconded by Dr. J. Elsdale Molson, who said it seemed to him a perfectly ousiness-like way of issuing the stock.

The motion was unanimously concurred in.

Thanks Are Tendered.

Mr. Alex. D. Fraser moved: "That the thanks of the shareholders are due, and are hereby tendered, to the president, vice-president and directors for their efficient services during the past year." He considered that the report showed the affairs of the bank to be excellent.

Dr. J. Elsdale Molson seconded the motion, observing that the shareholders ought to be most grateful to the hardworking directors for the splendid dividends and returns they were securing for the shareholders' capital, and had been doing for a long time.

The motion was unanimously agreed to.

been doing for a long time.

The motion was unanimously agreed to.

Mr. H. Markland Molson, on behalf of the directors, moved a vote of thanks to the general manager and the other officers of the bank, saying that the officers devoted a great deal of time and energy to the affairs of the bank, and every since he had been connected with it, first, as an officer, and then as a director, he had felt that its affairs were very carefully looked after, and he thought that every credit should be given to the general manager and his efficient staff for the untiring way in which they devoted themselves to the interests of the bank.

the untiring way in which they devoted themselves to the interests of the bank.

The vice-president, it seconding the motion, expressed the opinion that the bank had the finest staff of officers that could be found in any like institution. At the last annual meeting he had made the statement that the directors had had nothing to complain of throughout the year, there not having been a single fault on the part of the officers, and he thought he could say the same for the year just closed. There had not been anything serious against any officer during the year. during the year. The motion having been adopted, the general manager

briefly returned thanks on behalf of himself and staff. He expressed satisfaction with the staff, saying that each tried to do his duty, from the top to the bottom. He was very glad to confirm what the vice-president had said: that there had been no defalcation and no trouble worth speaking of for several years past. The bank had its own guarantee fund, which had been established for many years, and it had worked very satisfactorily from the beginning. The charge was only half of one per cent, on the amount of the bond for a certain number of years, not longer than fifteen. After that time an employee thad established his character and services in the bank, and no further payment was exacted.

Mr. George Durnford and Mr. C. E. Spragge were then named to act as scrutineers for the election of directors, and on the motion of Mr. R. W. Shepherd it was decided

that one ballot be cast.

The scrutineers thereupon reported the re-election of retiring board of directors, viz.; Messrs. J. P. Clegborn, H. Ewing, Lieut.-Col. Fred Henshaw, H. Markland Ilson, Wm. Molson Macpherson, Wm. C. McIntyre and Molson, Wm. M W. M. Ramsay.

W. M. Kamsay.

The president then thanked the shareholders for their attendance, and for the work they had done for the advantage of the bank generally.

The directors were re-elected, and at a subsequent meeting of the directors, Mr. Wm. Molson Macpherson was reelected president, and Mr. S. H. Ewing, vice-president for the ensuing year.

Earnings of the Toronto Railway Company for the first nine months of this year have increased \$254,300, 01 12% per cent. Estimating an increase in earnings for the remaining three months at the same percentage, the total earnings for the year should be about \$3,200,000.

An interesting statement has been presented by the Montreal Street Railway to the civic authorities, and shows that the total earnings of the company for the year ending August, 1900, \$2.625,000, out of which the city receives \$177,000. For the first time the earnings of the company are such that it must pay as high as twelve per cent. On 18 earnings to the corporation. When the earnings reach \$3,000,000 the city's percentage will be 15 per cent.

CALL TO DOCKS REFORM.

The possibilities of Canadian shipping were made manifest, to the Toronto Board of Trade on Tuesday, when Mr. F. B. Girdlestone, general manager of the Bristol docks, England, told what Bristol had done in the matter of dock construction and ficilities, and what he conceived to be Canada's duty in similar undertakings. Mr. Girdlestone is in Canada to confer with transportation authorities and trade associations, as to the possibility of establishing a regular service of passenger and cargo steamers between Canada and Bristol. He had visited Quebec and Montreal, where the found the harbor arrangements very inadequate, and the miserable shed reserved for Bristol trade at the latter port struck him as being the hut in which Sebastian Cabot died his clothes. Bristol, with a population of 360,000, had in the last two decades, expended \$30,000,000, giving it the second best harbor in the United Kingdom. Canadians must know that a large portion of Anglo-Canadian trade is being handled through United States ports. It was useless to expect England to put capital into ships to trade with the Dominion if the Dominion did not provide adequate facilities for handling the vessels. Montreal could be made a port of the highest efficiency, and he suggested a commission should be appointed to visit some of the large ports of the world and then to commence a vigorous reform in Canadian shipping arrangements and accommodation. The possibilities of Canadian shipping were made man adian shipping arrangements and adcommodation.

WESTM NEW

New Wes In the Industrial Building at number of exhibits of manufacture trict or to Vancouver was very may wisting mills, car shops, cannering visiting mills, car shops, canner in pressive lesson on how rapidly may at the coast. Lumbering, of course

at the coast. Lumpering, or course will do so for many years to come The daily cut of the New We million feet, and, as they operate a year, the yearly output is enorm that of the Fraser River Sawmills that of the Fraser River Sawmills and the true miles up the river that of the Fraser River Sawmills ated about four miles up the river many years ago, but was out of cuntil last year, when a new committely new outfit of machinery in the control of the riverse and the riverse research to this mill is 200,000 feet. Here he of 70,000 feet, and already ground kilns of the same capacity.

Logs Are Like Toys. The double band saws were huge logs were being turned and huge logs were being turned and steam nigger, as if they were mereting a SCOTE of more of cotta and there will be quite a mill v hundred and twenty-five men are hundred and tony are Hindoos. to be said later about Hindoo lab About half the output of this and shipped direct to Alberta an other half, the big sea-going vess

are loaded from the company's o boan at one end to the finished of boat at the other the plant is upand there is marvellously little
