Animals.

W. C. BAYNES, B.A.,

Secretary.

Just Published.

The Story of the Earth and Man.—By J. W. Dawson, F. R. S., Principal
and Vice-Chancellor of the McGill University, Montreal. (Hodder and Stough-
ton).—Geology as a science must always prove attractive; its study serves the
highest ends, and the facts, suggestions, and conclusions it evolves enlarge and
discipline the mind. The several chapters of this treatise were originally prepared
for, and appeared in, the *Lectures Four*; and now that they are gathered together,
and reproduced, with their illustrative diagrams, they make an exceedingly useful
volume—a volume containing an epitome of all the theories from time to time
advanced, and the modern arguments peculiar to this many-sided and important
while he avoids such technicalities as are likely to confuse the unscientific reader,
he leaves nothing untouched which is necessary to a fair—not to say complete—
comprehension of the whole science. With commendable reticence, Dr. Dawson
has left undiscussed the relation of scientific geology to the Mosaic account of the
creation of the world; but on this branch of the subject he has previously written
in his "Archæa," and, therefore, the less need to go over the ground a second
time. All, however, will agree with him, that geology, to be really useful, must
"be emancipated from the control of bald metaphysical speculation, and delivered
from that materialistic infidelity which, by robbing Nature of her spiritual element,
makes science dry, barren, and repulsive, diminishes its educational value, and even
renders it less efficient for purposes of practical research."

For Sale by

Price \$2.

DAWSON BROS.
